Competency Standard: AUTOMOTIVE SERVICE & REPAIR III Job Title: MOTORBIKE MECHANICS Strengthening Technical and Vocational Education and Training (STVET) Project ADB Grant 0211-LAC					

A Foreword

In order to ensure that the LAO PDR grows competitively over the coming years, we need to establish an ethos of excellence in everything that we do. This includes, particularly the Education & Employment sectors, as symbolized by Technical Vocational Education & Training (TVET).

Research has shown that countries without a functioning and effective TVET system will lose out in the competitiveness ratings, with a consequence negative impact on growth etc.

A.1 Project Title

Strengthen Technical Vocational Education & Training in LAO PDR

A.2 Project Donor & Number

ADB Grant No. 0211-LAO (SF)

B Purpose of this competency standard

The Purpose of the Competency Standard for the AUTOMOTIVE SERVICE AND REPAIR **Level III** is to provide a framework for Competency Based Training (CBT) Programmes resulting in Competent Motorbike Mechanics to support the automotive service and repair industry/sector in Lao PDR.

The AUTOMOTIVE SERVICE AND REPAIR **Level III** is defined in reference to the Prime Minister Decree Number 0036/PM published in 2011, the Ministry of Education and Sport Decree Number 4697/MoES11 published 9 December 2011, the Manual for Developing Competency Standards published December 2011 and the ASEAN Regional Qualification Framework in TVET.

C Competency Standard/ Qualification/ Job Description

This Competency, Standards/ Qualification of AUTOMOTIVE SERVICE AND REPAIR III provide a structured occupational outcome for domestic & commercial MOTORBIKE MECHANICS.

JOB DESCRIPTION

This qualification covers the skills and knowledge in Basic, Common & Core Competencies required by the automotive service and repair industry/sector for MOTORBIKE MECHANICS to repair and maintain the electrical and mechanical systems and components of cars and light vehicle. It is suitable for entry into the automotive service and repair industry/sector at **NVQF Level III** in Lao PDR.

Person deemed competent in this qualification:

- has theoretical knowledge in Motorbike Mechanic
- has a range of well-developed skills on MOTORBIKE MECHANIC to repair and maintain
- can perform complicated fabrication work using complex/multi-function equipment

- work on jobs requiring minimal tolerance
- be responsible for the entrusted equipment
- solve routine work problems using basic methods, tools materials and information

JOB ROLES/EMPLOYMENT OUTCOMES

The Certificate **Level III** in AUTOMOTIVE SERVICE AND REPAIR is intended to prepare new employees or recognize and develop existing workers who are performing electrical and mechanical service and repair tasks in the automotive service and repair industry/sector.

Employment outcomes targeted by this qualification is MOTORBIKE MECHANICS.

APPLICATION

The qualification is in line with CBT principles and is suitable for a Lao PDR Apprenticeship pathway

Where common/core units of competency are packaged to suit a particular industry sector or occupational outcome, Registered Training Organizations (RTOs) might issue, for example, a:

Certificate III in Automotive Service and Repair (specializing Motorbike Mechanic)

It should be noted that a qualification with a specialization does not change the title of the qualification

CAREER PATH INFORMATION

CAREER PATH INTO THE QUALIFICATION

This qualification may be accessed by direct entry. Credit will be granted towards this qualification to those who have completed Certificate II in AUTOMOTIVE SERVICE AND REPAIR and work experiences on that Certificate Level.

CAREER PATH FROM THE QUALIFICATION

Further training pathways from this qualification include Certificate IV within the AUTOMOTIVE SERVICE AND REPAIR training package qualifications.

D Outline of this Competency Standard

This Competency Standard contains *Units of Competency* as detailed within. These **Units** form the basis for CBT Learning Programmes for MOTORBIKE MECHANIC. Each **Unit** contains the required **Elements of Competency**. Each **Unit** being able to stand alone when applied in a work situation.

Each **Unit** can be amended in content or structure to meet the evolving needs of the MOTORBIKE MECHANICS. Changes and amendments to this Competency Standard will be

made in line with the existing Quality Assurance Procedures as approved by the appropriate authority.

This Competency Standard is structured in line with the approved Manual for Developing Competency Standards, developed as a part of the STVET programme. For Quality Assurance purposes, each Unit is coded in line with the example below:

Code Example

Occupation	Job	Sub Sector	Level	Unit Type	Unit No.	Version No
Machinery	Motorbike	Engine	NLVQF	Core	Series No	
Mechanics	Mechanics					
and Repair						
723	7231	2	3	3	008	01

Code example above displayed as:

723.7231.233.008.01

LAO AUTOMOTIVE SUB-SECTORS

Sub-Sector:

00 No sub-sector

10 General

20 Engine

30 Powertrain

40 Chassis & Suspension

50 Electrical

60 Body & Painting

Each Competency Standard for a Job contains a mix of Units structured as follows:

Basic Units – cover a range of Occupations

Common Units – Common to jobs in the automotive service and repair industry/sector

Core Units – Technical & Specific to this job

Competency Standard: AUTOMOTIVE SERVICE & REPAIR III Job Title: MOTORBIKE MECHANICS Strengthening Technical and Vocational Education and Training (STVET) Project ADB Grant 0211-LAC						

E BASIC UNITS OF COMPETENCY

Competency Standard: AUTOMOTIVE SERVICE & REPAIR III Job Title: MOTORBIKE MECHANICS Strengthening Technical and Vocational Education and Training (STVET) Project ADB Grant 0211-LAO			

UNIT 1 LEAD WORKPLACE COMMUNICATION

Unit Code	723.7231.031.001.01
Unit Descriptor	This unit covers the skills, knowledge and attitudes required to lead in the dissemination and discussion of ideas, information and issues in the workplace.

UNIT 1 Elements & Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA Italicized terms as elaborated in the Rang of Variables
Communicate information about workplace processes	 1.1 Appropriate <i>communication method</i> is selected 1.2 Multiple operations involving several topics areas are communicated accordingly
	1.3 Questions are used to gain extra information
	1.4 Correct sources of information are identified
	1.5 Information is selected and organized correctly
	1.6 Verbal and written reporting is undertaken when required
	1.7 Communication skills are maintained in all situations
2. Lead workplace	2.1 Response to workplace issues are sought
discussions	2.2 Response to workplace issues are provided immediately
	2.3 Constructive contributions are made to workplace discussions on such issues as production, quality and safety
	2.4 Goals/objectives and action plan undertaken in the workplace are communicated
3. Identify and	3.1 Issues and problems are identified as they arise
communicate issues arising in the workplace	3.2 Information regarding problems and issues are organized coherently to ensure clear and effective communication
	3.3 Dialogue is initiated with appropriate personnel
	3.4 Communication problems and issues are raised as they arise

UNIT 1 Range of Variables

VARIABLES	RANGE		
1. Methods of	1.1 Non-verbal gestures		
communication	1.2 Verbal		
	1.3 Face to face		
	1.4 Two-way radio		
	1.5 Speaking to groups		
	1.6 Using telephone		
	1.7 Written		
	1.8 Internet		

UNIT 1 Evidence Guide

		1	
1.	Critical aspects of Competency		Assessment requires evidence that the candidate:
	Competency	1.1	Dealt with a range of communication/information at one time
		1.2	Made constructive contributions in workplace issues
		1.3	Sought workplace issues effectively
		1.4	Responded to workplace issues promptly
		1.5	Presented information clearly and effectively written form
		1.6	Used appropriate sources of information
		1.7	Asked appropriate questions
		1.8	Provided accurate information
2.	Underpinning knowledge and attitudes	2.1	Organization requirements for written and electronic communication methods
		2.2	Effective verbal communication methods
3.	Underpinning skills	3.1	Organize information
		3.2	Understand and convey intended meaning
		3.3	Participate in variety of workplace discussions
		3.4	Comply with organization requirements for the use of written and electronic communication methods
4.	Resource implications		The following resources should be provided:
		4.1	Workplace location or simulated work area
		4.2	Variety of Information and instruction to the task
		4.3	Communication tools
5.	Method of assessment		Competency in this Unit should be assessed through:

Competency Standard: AUTOMOTIVE SERVICE & REPAIR III | Job Title: MOTORBIKE MECHANICS Strengthening Technical and Vocational Education and Training (STVET) Project | ADB Grant 0211-LAO

		5.1	Direct Observation
		5.2	Interview
			Evidence provided for competency determination will be Valid, Sufficient & Current
6.	Context for assessment	6.1	Competency may be assessed on the job or simulated environment.
		6.2	Assessment shall be observed while task are being undertaken whether individually or in group
		6.3	Assessment must be undertaken in accordance with Lao PDR CBT assessment guidelines

UNIT 2 LEAD SMALL TEAMS

Unit Code	723.7231.031.002.01		
Unit Descriptor	This unit covers the Skills, Knowledge and Attitudes required leading small team in the workplace.		

UNIT 2 Elements & Performance Criteria

ELEMENTS		PERFORMANCE CRITERIA		
		Italicized terms as elaborated in the Rang of Variables		
1.	Provide team leadership	1.1 Work requirements are identified and presented to team members		
		1.2 Reasons for instructions and requirements are communicated to team members		
		1.3 Team members' queries and concerns are recognized, discussed and dealt with		
2.	Assign responsibilities	2.1 Duties, and responsibilities are allocated having regard to the skills, knowledge and aptitude required to properly undertake the assigned task and according to company policy		
		2.2 Duties are allocated having regard to individual preference, domestic and personal considerations, whenever possible		
3.	Set performance expectations for team	3.1 Performance expectations are established based on client needs and according to assignment requirements		
	members	3.2 Performance expectations are based on individual team members duties and area of responsibility		
		3.3 Performance expectations are discussed and disseminated to individual team members		
4.	Supervised team performance	4.1 Monitoring of performance takes place against defined performance criteria and/or assignment instructions and corrective action taken if required		
		4.2 Team members are provided with <i>feedback</i> , positive support and advice on strategies to overcome any deficiencies		
		4.3 Performance issues which cannot be rectified or addressed within the team are referenced to appropriate personnel according to employer policy		
		4.4 Team members are kept informed of any changes in the priority allocated to assignments or tasks which		

LEAD SMALL TEAMS 15

	might impact on client/customer needs and satisfaction
4.5	Team operations are monitored to ensure that employer/client needs and requirements are met
4.6	Follow-up communication is provided on all issues affecting the team
4.7	All relevant documentation is completed in accordance with company procedures

UNIT 2 Range of Variables

VARIABLES	RANGE
1. Work requirements	1.1 Client Profile
	1.2 Assignment instructions
Team member's concerns	2.1 Roster/shift details
3. Monitor performance	3.1 Formal process
	3.2 Informal process
4. Feedback	4.1 Formal process
	4.2 Informal process
5. Performance issues	5.1 Work output
	5.2 Work quality
	5.3 Team participation
	5.4 Compliance with workplace protocols
	5.5 Safety
	5.6 Customer service

UNIT 2 Evidence Guide

Critical aspects of Competency	Assessment requires evidence that the candidate: 1.1 Maintained or improved individuals and/or team performance given a variety of possible scenario
	1.2 Assessed and monitored team and individual performance against set criteria
	1.3 Represented concerns of a team and individual to next level of management or appropriate specialist and to negotiate on their behalf
	1.4 Allocated duties and responsibilities, having regard to individual's knowledge, skills and aptitude and the needs of the tasks to be performed

16 <u>LEAD SMALL TEAMS</u>

		1.5	Set and communicated performance expectations for a range of tasks and duties within the team and provided feedback to team members
2.	Underpinning knowledge and attitudes	2.1 2.2 2.3 2.4 2.5 2.6	Company policies and procedures Relevant legal requirements How performance expectations are set Methods of Monitoring Performance Client expectations Team member's duties and responsibilities
3.	Underpinning skills	3.1 3.2 3.3 3.4	Communication skills required for leading teams Informal performance counseling skills Team building skills Negotiating skills
4.	Resource implications	4.1 4.2	The following resources should be provided: Relevant workplace location or simulated work area Materials relevant to the proposed activity or task
5.	Method of assessment	5.1 5.2 5.3	Competency in this Unit should be assessed through: Direct observations of work activities of the individual member in relation to the work activities of the group Observation of simulation and/or role play involving the participation of individual member to the attainment of organizational goal Case studies and scenarios as a basis for discussion of issues and strategies in teamwork Evidence provided for competency determination will be Valid, Sufficient & Current
6.	Context for assessment	6.1 6.2 6.3	Competency may be assessed on the job or simulated environment. Assessment shall be observed while task are being undertaken whether individually or in group Assessment must be undertaken in accordance with Lao PDR CBT assessment guidelines

LEAD SMALL TEAMS 17

UNIT 3 PRACTICE NEGOTIATION SKILLS

Unit Code	723.7231.031.003.01
Unit Descriptor	This Unit covers the Skills, Knowledge and Attitudes required collecting information in order to negotiate to a desired outcome and participate in the negotiation.

UNIT 3 Elements & Performance Criteria

	ELEMENTS		PERFORMANCE CRITERIA
		lta	alicized terms as elaborated in the Rang of Variables
1.	Plan negotiations	1.1	Information on <i>preparing for negotiation</i> is identified and included in the plan
		1.2	Information on creating <i>nonverbal environments</i> for positive negotiating is identified and included in the plan
		1.3	Information on <i>active listening</i> is identified and included in the plan
		1.4	Information on different <i>questioning techniques</i> is identified and included in the plan
		1.5	Information is checked to ensure it is correct and up- to- date
2.	Participate in negotiation	2.1	Criteria for successful outcomes are agreed upon by all parties
		2.2	Desired outcome of all parties are considered
		2.3	Appropriate language is used throughout the negotiation
		2.4	A variety of questioning techniques are used
		2.5	The issues and processes are documented and agreed upon by all parties
		2.6	Possible solutions are discussed and their viability assessed
		2.7	Areas for agreement are confirmed and recorded
		2.8	Follow-up action is agreed upon by all parties

UNIT 3 Range of Variables

VARIABLES	RANGE	
Preparing for negotiation	1.1 Background information on other parties to the negotiation	

		1.2	Good understanding of topic to be negotiated
		1.3	Clear understanding of desired outcome/s
		1.4	Personal attributes
			1.4.1 Self-awareness
			1.4.2 Self esteem
			1.4.3 Objectivity
			1.4.4 Empathy
			1.4.5 respect for others
			1.4.6 Interpersonal skills
			1.4.7 listening/reflecting
			1.4.8 Nonverbal communication
			1.4.9 Assertiveness
			1.4.10 behavior labeling
			1.4.11 testing understanding
			1.4.12 seeking information
			1.4.13 self-disclosing
		1.5	Analytic skills
			1.5.1 Observing differences between content and process
			1.5.2 Identifying bargaining information
			1.5.3 Applying strategies to manage process
			1.5.4 Applying steps in negotiating process
			1.5.5 Strategies to manage conflict
			1.5.6 Steps in negotiating process
			1.5.7 Options within organization and externally for resolving conflict
2.	Non-verbal	2.1	Friendly reception
	environments	2.2	Warm and welcoming room
		2.3	Refreshments offered
		2.4	Lead in conversation before negotiation begins
3.	Active listening	3.1	Attentive
		3.2	Don't interrupt
		3.3	Good posture
		3.4	Maintain eye contact
		3.5	Reflective listening
4.	Questioning	4.1	Direct
	techniques	4.2	Indirect

4.3 Open-ended

UNIT 3 Evidence Guide

1.	Critical aspects of		Assessment requires evidence that the candidate:
	Competency	1.1	Demonstrated sufficient knowledge of the factors influencing negotiation to achieve agreed outcome
		1.2	Participated in negotiation with at least one person to achieve an agreed outcome
2.	Underpinning	2.1	Codes of practice and guidelines for the organization
	knowledge and	2.2	Organizations policy and procedures for negotiations
	attitudes	2.3	Decision making and conflict resolution strategies procedures
		2.4	Problem solving strategies on how to deal with unexpected questions and attitudes during negotiation
		2.5	Flexibility
		2.6	Empathy
3.	Underpinning skills	3.1	Interpersonal skills to develop rapport with other parties
		3.2	Communication skills (verbal and listening)
		3.3	Observation skills
		3.4	Negotiation skills
4.	Resource implications		The following resources should be provided:
		4.1	Room with facilities necessary for the negotiation process
		4.2	Human resources (negotiators)
5.	Method of assessment		Competency in this Unit should be assessed through:
		5.1	Observation/demonstration and questioning
		5.2	Portfolio assessment
		5.3	Oral and written questioning
			Evidence provided for competency determination will be Valid, Sufficient & Current
6.	Context for assessment	6.1	Competency should be assessed on the job or simulated environment.
		6.2	Assessment must be undertaken in accordance with Lao PDR CBT assessment guidelines
-			

UNIT 4 SOLVE PROBLEMS RELATED TO WORK ACTIVITIES

Unit Code	723.7231.031.004.01		
Unit Descriptor	This unit covers the Skills Knowledge & Attitudes required to solve problems related to workplace activities		

UNIT 4 Elements & Performance Criteria

ELEMENTS		PERFORMANCE CRITERIA		
			alicized terms as elaborated in the Rang of Variables	
1.	Identify the problem	1.1	Variances are identified from normal operating parameters; and product quality	
		1.2	Extent, cause and nature are of the problem are defined through observation, investigation and analytical techniques	
		1.3	Problems are clearly stated and specified	
2.	Determine problem causes	2.1	Possible causes are identified based on experience and the use of problem solving tools / analytical techniques.	
		2.2	Possible cause statements are developed based on findings	
		2.3	Fundamental causes are identified per results of investigation conducted	
3.	Determine corrective action	3.1	All possible options are considered for resolution of the problem	
		3.2	Strengths and weaknesses of possible options are considered	
		3.3	Corrective actions are determined to resolve the problem and possible future causes	
		3.4	Action <i>plans</i> are developed identifying measurable objectives, resource needs and timelines in accordance with safety and operating procedures	
4.	Provide	4.1	Report on recommendations are prepared	
	recommendation 4.	4.2	Recommendations are presented to appropriate personnel	
		4.3	Recommendations are followed-up, if required	

UNIT 4 Range of Variables

VARIABLES		RANGE
1. Analytical techniques	1.1	Brainstorming
	1.2	Intuitions/Logic
	1.3	Cause and effect diagrams
	1.4	Pareto analysis
	1.5	SWOT analysis
	1.6	Gant chart, Pert CPM and graphs
	1.7	Scatter grams
2. Problem	2.1	Non – routine process and quality problems
	2.2	Equipment selection, availability and failure
	2.3	Teamwork and work allocation problem
	2.4	Safety and emergency situations and incidents
3. Action plans	3.1	Priority requirements
	3.2	Measurable objectives
	3.3	Resource requirements
	3.4	Timelines
	3.5	Co-ordination and feedback requirements
	3.6	Safety requirements
	3.7	Risk assessment
	3.8	Environmental requirements

UNIT 4 Evidence Guide

1.	Critical aspects of Competency	1.1 1.2 1.3 1.4	Assessment requires evidence that the candidate: Identified the problem Determined the fundamental causes of the problem Determined the correct / preventive action Provided recommendation to manager
			These aspects may be best assessed using a range of scenarios / case studies / what ifs as a stimulus with a walk through forming part of the response. These assessment activities should include a range of problems, including new, unusual and improbable situations that may have happened
2.	Underpinning knowledge and attitudes	2.1	Competence includes a thorough knowledge and understanding of the process, normal operating parameters, and product quality to recognize non-

	standard situations
	2.2 Competence to include the ability to apply and explain, sufficient for the identification of fundamental cause, determining the corrective action and provision of recommendations
	2.3 Relevant equipment and operational processes
	2.4 Enterprise goals, targets and measures
	2.5 Enterprise quality, OHS and environmental requirement
	2.6 Principles of decision making strategies and techniques
	2.7 Enterprise information systems and data collation
	2.8 Industry codes and standards
3. Underpinning skills	 3.1 Using range of formal problem solving techniques 3.2 Identifying and clarifying the nature of the problem 3.3 Devising the best solution 3.4 Evaluating the solution
	3.5 Implementation of a developed plan to rectify the problem
4. Resource implications	The following resources should be provided:
	4.1 Assessment will require access to an operating plant over an extended period of time, or a suitable method of gathering evidence of operating ability over a range of situations.
	4.2 A bank of scenarios / case studies / what ifs will be required
	4.3 A bank of questions which will be used to probe the reason behind the observable action
	4.4 Relevant workplace location or simulated work area
	4.5 Materials relevant to the proposed activity or task
5. Method of assessment	5.1 The unit should be assessed in a holistic manner as is practical and may be integrated with the assessment of other relevant units of competency.
	5.2 Assessment will occur over a range of situations, which will include disruptions to normal, smooth operation.
	5.3 Simulation should be based on the actual workplace and will include walk through of the relevant competency components.
	5.4 Case studies on solving problems in the workplace

Competency Standard: AUTOMOTIVE SERVICE & REPAIR III | Job Title: MOTORBIKE MECHANICS Strengthening Technical and Vocational Education and Training (STVET) Project | ADB Grant 0211-LAO

		5.5	Observation
			Evidence provided for competency determination will be Valid, Sufficient & Current
6.	Context for assessment	6.1	Competency should be assessed at the workplace or simulated environment.
		6.2	Assessment shall be observed with relevant teamwork or operation units
		6.3	Assessment must be undertaken in accordance with Lao PDR CBT assessment guidelines

UNIT 5 USE MATHEMATICAL CONCEPTS & THEORIES

Unit Code	723.7231.021.005.01
Unit Descriptor	This Unit covers the Skills, Knowledge and Attitudes required in the application of mathematical concepts and techniques.

UNIT 5 Elements & Performance Criteria

	ELEMENTS	PERFORMANCE CRITERIA Italicized terms as elaborated in the Rang of Variables	
1.	Identify mathematical tools and techniques to solve problem	1.1	Problem areas are identified based on given condition <i>Mathematical techniques</i> are selected based on the given problem
2.	Apply mathematical procedure/ solution	2.1	Mathematical techniques are applied based on the problem identified
		2.2	Mathematical computations are performed to the level of accuracy required for the problem
		2.3	Results of mathematical computation is determined and verified based on job requirements
3.	Analyze results	3.1	Result of application is reviewed based on expected and required specifications and outcome
		3.2	Appropriate action is applied in case of error

UNIT 5 Range of Variables

VARIABLES	RANGE
Mathematical techniques	Should be included, but are not limited to: 1.1 Four fundamental operations
	1.2 Measurements1.3 Use/Conversion of units of measurements
	1.4 Use of standard formulas
2. Appropriate action	2.1 Review in the use of mathematical techniques (e.g. recalculation, re-modeling)
	2.2 Report error to immediate superior for proper action

UNIT 5 Evidence Guide

1.	Critical aspects of Competency	1.1	Assessment requires evidence that the candidate: Identified, applied and reviewed the use of mathematical concepts and techniques to workplace problems
2.	Underpinning knowledge and attitudes	2.1 2.2 2.3 2.4	Fundamental operation (addition, subtraction, division, multiplication) Measurement system Precision and accuracy Basic measuring tools/devices
3.	Underpinning skills	3.1 3.2 3.3	Applying mathematical computations Using calculator Using different measuring tools
4.	Resource implications	4.1 4.2 4.3 4.4	The following resources should be provided: Workplace location or simulated work area Calculator Basic measuring tools Case Problems
5.	Method of assessment	5.1 5.2 5.3	Competency in this Unit should be assessed through: Interview/ oral questioning Demonstration on simulated situation Written/Oral examination Evidence provided for competency determination will be Valid, Sufficient & Current
6.	Context for assessment	6.1	Competency should be assessed in the workplace or simulated environment. Assessment must be undertaken in accordance with Lao PDR CBT assessment guidelines

UNIT 6 USE RELEVANT TECHNOLOGIES

Unit Code	723.7231.021.006.01
Unit Descriptor	This Unit covers the Skills, Knowledge and Attitudes required in selecting, sourcing and applying appropriate technologies in the workplace.

UNIT 6 Elements & Performance Criteria

	ELEMENTS	lta	PERFORMANCE CRITERIA alicized terms as elaborated in the Rang of Variables
1.	Study/ select appropriate technology	1.1	Usage of different <i>technologies</i> is determined based on job requirements Selected Appropriate technology is based on work requirements
2.	Apply relevant technology	2.12.22.3	Relevant technology is effectively used in carrying out function Applicable software and hardware are used as per task requirement Management concepts are observed and practiced as per established industry practices
3.	Maintain/enhance relevant technology	3.1	Maintenance of technology is applied in accordance with the industry standard operating procedure, manufacturer's operating guidelines and occupational health and safety procedure Updating of technology is maintained in accordance with job requirement
		3.3	Technology failure/ defect is immediately reported in line with standard operating procedure

UNIT 6 Range of Variables

VARIABLES		RANGE	
1. Technology		Should be included, but not limited to:	
	1.1	Office technology	
	1.2	Industrial technology	
	1.3	System technology	
	1.4	Information technology	
	1.5	Training technology	

2. Management concepts Should be included, but not limited to: 2.1 Real Time Management 2.2 Total Quality Management 2.3 Other management/productivity tools 3. Industry standard operating procedure 3.1 Written guidelines relative to the usage of office technology/equipment 3.2 Verbal advise/instruction from the co-worker 4. Manufacturer's operating guidelines/ instructions 4.1 Verbal or written and graphical instructions, signagement 4.2 Safe work procedures related to task	
operating procedure technology/equipment 3.2 Verbal advise/instruction from the co-worker 4. Manufacturer's Manuals and Information may include: operating guidelines/instructions Verbal or written and graphical instructions, signage work schedules/plans/specifications	
Manufacturer's	
operating guidelines/ instructions 4.1 Verbal or written and graphical instructions, signage work schedules/plans/specifications	
4.2 Safe work procedures related to task	e,
4.2 Sale work procedures related to task	
4.3 Regulatory legislative requirements pertaining to the automotive industry including Lao Design Rules	ie
4.4 Repair-, specification data-, periodic service maintenance manual/handbook issued by company/manufacturer/component supplier	
4.5 Written instruction/manuals of specific technology/ equipment	
4.6 General instruction manual	
4.7 Verbal advise from manufacturer relative to the operation of equipment	
5. Occupational health and safety procedure OHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures, and mainclude:	y
5.1 To conduct of operational risk assessment and treatments associated with Vehicular movements, hazardous substances, Electrical safety manual, linard shifting working in proximity to others a site visitors	iting
5.2 Use of personal protective equipment that include prescribed under legislation regulations codes of practice and workplace policies and practice	
6. Appropriate action 6.1 Implementing preventive maintenance schedule 6.2 Coordinating with manufacturer's technician	

UNIT 6 Evidence Guide

1.	Critical aspects of		Assessment requires evidence that the candidate:
	Competency	1.1	Studied and selected appropriate technology consistent with work requirements
		1.2	Applied relevant technology
		1.3	Maintained and enhanced operative ability of relevant technology
2.	Underpinning	2.1	Awareness on technology and its function
	knowledge and	2.2	Repair and maintenance procedure
	attitudes	2.3	Operating instructions
		2.4	Applicable software
		2.5	Communication techniques
		2.6	Health and safety procedure
		2.7	Company policy in relation to relevant technology
		2.8	Different management concepts
		2.9	Technology adaptability
3.	Underpinning skills	3.1	Relevant technology application/implementation
		3.2	Basic communication skills
		3.3	Software applications skills
		3.4	Basic troubleshooting skills
4.	Resource implications		The following resources should be provided:
		4.1	Workplace location or simulated work area
		4.2	Relevant technology
		4.3	Interview and demonstration questionnaires
		4.4	Assessment packages
5.	Method of assessment		Competency in this Unit should be assessed through:
		5.1	Interview/ oral questioning
		5.2	Demonstration actual or simulated situation
		5.3	Authenticated portfolio (related certificates of training/seminar)
			Evidence provided for competency determination will be Valid, Sufficient & Current
6.	Context for assessment	6.1	Competency should be assessed in the workplace or simulated environment.
		6.2	Assessment must be undertaken in accordance with Lao PDR CBT assessment guidelines

UNIT 7 APPLY GENDER AND SOCIAL EQUITY PRINCIPLES AND POLICIES

Unit Code	723.7231.021.007.01
Unit Descriptor	This unit covers the knowledge, skills and attitudes to apply principles and policies on gender and social equity contributing to positive and productive work environment. This deals with complying with gender and social equity guidelines in the workplace; promoting gender and social equity in the workplace; and recognizing and preventing gender abuse and other forms of social inequities.

UNIT 7 Elements & Performance Criteria

	ELEMENTS		PERFORMANCE CRITERIA
		lta	alicized terms as elaborated in the Rang of Variables
1.	Follow guidelines or rules of conduct related to gender and social equity in the workplace	1.1	Workplace practices and work instructions relating to interacting with different social groups based on gender, ethnicity and disability are recognized and followed, and clarification is sought where necessary.
		1.2	Relevant <i>legislation, codes and national standards</i> that impact on gender and social equity are recognized and followed.
		1.3	Introduction of and amendments to guidelines in the work conduct related to gender and social fairness practices are responded to positively and promptly in accordance with organizational requirements.
2.	Contribute to improve workplace guidelines in promoting gender and social equity	2.1	Suggestions are made to designated personnel on how to improve social interaction and communication in the workplace to better promote gender and social equity
		2.2	Information is gathered and improvements are suggested to help improve workplace guidelines and policies in promoting observing gender and social fairness.
		2.3	Gender and social equity issues in the workplace practices are discussed in the workplace with colleagues and designated personnel.
		2.4	Contributions to the review of workplace guidelines and policies gender and social equity guidelines and policies are made within limits of responsibility
3.	Recognize and report suspected cases of	3.1	Signs and manifestations of gender and social inequities and its impact in the workplace are

gender and other forms of social inequity	3.2	recognized. Information about or observations of a suspected
		problem related to gender and social inequity are reported to supervisors and appropriate authorities.
	3.3	Location and extent of suspected gender and social inequities is accurately <i>recorded</i> .
	3.4	Reports on the effect of gender and social inequities are completed according to organizational guidelines.

UNIT 7 Range of Variables

VARIABLES	RANGE
Workplace practices and work instructions	1.1 Social diversity awareness, recognition and analysis in the workplace
	1.2 Use of gender fair and socially inclusive language in dealing with co-workers and students
	1.3 Sexual harassment and bullying incident recording and reporting procedures
	1.4 Verbal instructions from persons with responsibility related to gender and social equity awareness and sensitivity
Legislation, codes and national standards	2.1 Code of Conduct on sexual harassment in TVET institutions under MoES
	2.2 National Strategy for the Advancement of Women, 2005-2010 (includes goals and programmes to promote Lao women's education, skill levels, income generating opportunities, among others
	2.3 Lao PDR Law on Development and Protection of Women (Among others, aims to promote women's knowledge and competency, revolutionary morals and virtues, gender equality; seeks to eliminate all forms of discrimination against women; creates enabling conditions for women's participation; and for women to be equal force in national protection and development
	2.4 Labor Law of Lao PDR, 1994 (Articles 2, 39 & 35)
	2.5 Constitution of Lao PDR, 2003 (Articles 22, 24 & 27, statement on women of all ethnic groups should receive equal treatment in terms of legal rights, economic and social opportunities)
	2.6 National obligations to international human rights conventions (Convention on the Elimination of all Forms of Discrimination against Women (CEDAW), 1981; Convention on the Rights of the Child (CRC),

3.1 Be sensitive in terms of gender, ethnicity and disability in verbal and non-verbal communication 3.2 Stop the repetition of sexist and discriminatory sex jokes 3.3 Create and share jokes that are not told at the expense of different social groups 3.4 Recognize the rights of different social groups i.e. women, different ethnic groups, the disabled to equal access to training and skills development, respectful treatment, etc. 4. Designated personnel 4.1 School Administrator 4.2 Head teacher 4.3 Teacher and school staff designated as gender and social equity focal point 5.1 Guiding workplace conduct against committing and reporting sexual harassment 5.2 Using language that is sensitive in terms of gender, ethnicity and disability 5.3 Information on personnel policies that are aligned with national and official policies and guidelines that uphold the rights of women, ethnic groups and the disabled Provision of separate and secure accommodations, tollets wash and resting areas for women, ethnic groups and disabled people 5.5 The designation of a gender focal point among teachers, non-teaching staff and among student population 6. Gender and social equity issues 6.1 Sexual harassment 6.2 Bullying 6.3 Voyeurism 6.4 Different torms of gender-based violence 1 Inappropriate and discriminatory language 6.6 Sex jokes that are discriminatory against women, ethnic groups, disabled people 5.7 Discrimination in the workplace 7. Signs or manifestations 7. Signs or manifestations 7. Signs or manifestations 7. Signs or manifestations				1990

9. Recorded	9.1 Incident report
	9.2 Public petitions
	9.3 CCTV in the workplace
10. Designated personnel	10.1 School Administrator
	10.2 Head teacher
	10.3 Teacher and school staff designated as gender and social equity focal point

UNIT 7 Evidence Guide

Critical aspects of Competency	1.1	Demonstrated knowledge of workplace practices and work instructions
	1.2	Described relevant legislations, codes and national standards related to gender and social equity issues in the workplace
	1.3	Followed workplace practices, policies and guidelines related to gender and social equity
	1.4	Contributed to improve workplace guidelines in promoting gender and social equity
	1.5	Recognized and reported on suspected cases of gender and other forms of social inequity
	1.6	Reported, recorded or became aware of the need to report and document lack of compliance with guidelines and policies on gender and social fairness in the workplace
Underpinning knowledge and attitudes	2.1	Relevant legislation from all levels of government on gender and other social equity issues involving ethnic groups and disability
	2.2	Relevant gender and social equity official legislation, policies and workplace practices and procedures
	2.3	Good practice approaches relevant to work area particularly in regard to observance of and compliance

	with guidelines and policies that uphold and promote gender and social equity.	Э
	2.4 Gender and other social equity issues, especially in regard to sexual harassment and gender and other discrimination in the workplace	
	2.5 Gender issues in TVET areas traditionally not associated with women	
	2.6 General work place practices and their potential impact on the gender and other dimensions of social equity	ıl
3. Underpinning skills	3.1 Discuss and explain gender and other social equity issues in TVET	
	3.2 Communicate with co-workers and students in an inclusive manner that respects the rights of the different groups that constitute the workplace and the classroom	ıe
	3.3 Recognize signs and manifestations of sexual harassment and other forms of gender-based violen in the workplace and in the classroom	ce
	3.4 Follow workplace directions and instructions	
	3.5 Ability to report and document cases of sexual harassment and other forms of gender-based violence and violence directed at other disadvantaged groups	
4. Resource implications	4.1 Basic sensitization workshop on gender and other social equity issues	
	4.2 Legislation, policies, procedures, protocols and loca ordinances relating to gender and social equity	I
	4.3 Case studies and scenarios relating to the reporting and handling of cases of sexual harassment and oth forms of gender-based violence	
5. Method of assessment	5.1 Competency may be assessing through:	
	5.2 Written or oral Examination	
	5.3 Certificate of attendance in basic sensitization workshop on gender and other social equity issues Evidence provided for competency determination with be Valid, Sufficient & Current	ill
Context for assessment	6.1 Competency should be assessed on workplace or simulated environment.	
	6.2 Assessment must be undertaken in accordance with Lao PDR CBT assessment guidelines	1

F COMMON UNIT OF COMPETENCY

Competency Standard: AUTOMOTIVE SERVICE & REPAIR III Job Title: MOTORBIKE MECHANICS Strengthening Technical and Vocational Education and Training (STVET) Project ADB Grant 0211-LAO				

UNIT 8 OBSERV POCEDURES, SPECIFICATIOS & MANUALS OF INSTRUCTION

Unit Code	723.7231.122.001.01
Unit Descriptor	This unit covers the Skills, Knowledge and Attitudes required in identifying, interpreting, applying services to specifications and manuals and storing manuals.

UNIT 8 Elements & Performance Criteria

	ELEMENTS	lta	PERFORMANCE CRITERIA alicized terms as elaborated in the Rang of Variables
1.	Identify and access manuals/ specifications	1.1	Appropriate manuals are identified and accessed as per job requirements
		1.2	Version and date of manual are checked to ensure that correct specification and procedures are identified
2.	Interpret manuals/ specifications	2.1	Relevant sections, chapters of specifications/ manuals are located in relation to the work to be conducted
		2.2	Information and procedure in the manual are interpreted in accordance with industry practices
3.	Apply information in manuals/ specifications	3.1	Work steps are correctly identified in accordance with manufacturer's specification and Job requirements
		3.2	Manual data are applied according to the given task
		3.3	All correct sequencing and adjustments are interpreted in accordance to the manual or specifications
4.	Store manuals	4.1	Manual or specification is stored appropriately to prevent damage, ready access and updating of information when required in accordance with company requirements

UNIT 8 Range of Variables

VARIABLES		RANGE
Manuals and Information	1.1	Regulatory legislative requirements pertaining to the automotive industry including Lao Design Rules
	1.2	Repair manual/handbook issued by company/manufacturer/component supplier
	1.3	Specification data/manual/handbook issued by company/manufacturer/component supplier
	1.4	Periodic Service Maintenance Data manual/handbook

	issued by company/manufacturer/component sup	plier
	1.5 Tools, workshop-, test equipment and OHS user manual and service guide issued by company/manufacturer/component supplier	
2. Applications	Manuals used for System/components may be fit to:	ted
	2.1 Light vehicles	
	2.2 Agro-Machinery	
	2.3 Outdoor power equipment	
	2.4 Marine craft	
	2.5 Plant	
Company/ workshop standard operating	Manuals and Information used for Company/work standard operating procedures include:	kshop
procedures	3.1 Written instructions issued by authorized persona	al
	3.2 Job order slip	
	3.3 Spare parts ordering form	

UNIT 8 Evidence Guide

1.	Critical aspects of		Assessment requires evidence that the candidate:
	Competency	1.1	Listed materials and tools according to quantity and job requirements
		1.2	Requested materials and tools according to the list prepared and as per company standard operating procedures
		1.3	Inspected issued materials and tools as per quantity and job specifications
		1.4	Tools provided with appropriate safety devices
2.	Underpinning	2.1	Types and uses of construction materials and tools
	knowledge and	2.2	Different forms
	attitudes	2.3	Requisition procedures
3.	Underpinning skills	3.1	Preparing materials and tools
		3.2	Proper handling of tools and equipment
		3.3	Following instructions
4.	Resource implications		The following resources should be provided:
		4.1	Workplace location
		4.2	Materials relevant to the unit of competency
		4.3	Technical data/manual/handbook and specifications

Competency Standard: AUTOMOTIVE SERVICE & REPAIR III | Job Title: MOTORBIKE MECHANICS Strengthening Technical and Vocational Education and Training (STVET) Project | ADB Grant 0211-LAO

			relevant to the activities
5.	Method of assessment		Competency in this Unit may be assessed through:
		5.1	Direct observation and oral questioning
			Evidence provided for competency determination will be Valid, Sufficient & Current
6.	Context for assessment	6.1	Competency may be assessed on the job or simulated environment.
		6.2	Assessment must be undertaken in accordance with Lao PDR CBT assessment guidelines

UNIT 9 INTERPRET TECHNICAL DRAWEING & PLANS

Unit Code	723.7231.122.002.01
Unit Descriptor	This unit covers the Skills, Knowledge and Attitudes required in analyzing and interpreting symbols, data and work plan based on the required performance standards.

UNIT 9 Elements & Performance Criteria

	ELEMENTS	PERFORMANCE CRITERIA Italicized terms as elaborated in the Rang of Variables	
1.	Analyze signs, symbols and data	1.1	Technical plans are obtained according to job requirements
		1.2	Signs, symbols and data are identified according to job specifications
		1.3	Signs symbols and data are determined according to classification or as appropriate in drawing
2.	Interpret technical drawings and plans	2.1	Necessary tools, materials and equipment are identified according to the drawing & plan
		2.2	Components, assemblies or objects are recognized as required
		2.3	Dimensions are identified as appropriate to the plan
		2.4	Specification details are matched with existing/available resources and in line with job requirements
		2.5	Free hand sketches produced in line with needs

UNIT 9 Range of Variables

VARIABLES	RANGE
Technical Drawing/ Plans	Technical Drawing/Plans including but not limited to: 1.1 Welding plans 1.2 Welding Procedures Specifications (WPS)
	1.3 Auto mechanic plans1.4 Agro-Machinery plans1.5 Motorbike plans
	1.6 Electrical wiring plans1.7 OHS work plans
	1.8 Plans, schematic diagrams in Company/manufacturer/component supplier repair,

	specification data and Periodic Service Maintenance Data manual/handbook
2. Applications	Including but not limited to:
	2.1 Argo Machinery Mechanic and Repair
	2.2 Auto Mechanic and Repair
	2.3 Motorbike Mechanic and Repair
	2.4 Welding
3. Drawing	3.1 Drawing symbols
	3.2 Alphabet of lines
	3.3 Orthographic views
	3.3.1 Front view
	3.3.2 Right side view/left side view
	3.3.3 Top view
	3.3.4 Pictorial
	3.4 Schematic diagram
	3.5 Electrical drawings
	3.6 Structural drawings
	3.7 Welding drawing
	3.8 Welding symbols
4. Tools and material	Including but not limited to:
	4.1 Compass
	4.2 Divider
	4.3 Rulers
	4.4 Triangles
	4.5 Drawing tables
	4.6 Computer

UNIT 9 Evidence Guide

Critical aspects of Competency	1.1	Assessment requires evidence that the candidate: Identified and determined signs, symbols and data according to work plan, job requirements and
	1.2	classifications Identified tools and equipment in accordance with job requirements
	1.3	Listed supplies and materials according to blueprint specifications
	1.4	Drawn work plan following specifications

		1.5	Demonstrated ability to determine job specifications based on working / technical drawing
2.	Underpinning		TRADE MATHEMATICS
	knowledge and	2.1	Linear measurement
	attitudes	2.2	Dimension
		2.3	Unit conversion
			BLUEPRINT READING AND PLAN SPECIFICATION
		2.4	Electrical, mechanical plan, symbols and abbreviations
		2.5	Drawing standard symbols
			TRADE THEORY
		2.6	Basic technical drawing
		2.7	Types technical plans
		2.8	Various types of drawings
		2.9	Notes and specifications
3.	Underpinning skills	3.1	Interpreting drawing/orthographic drawing
		3.2	Interpreting technical plans
		3.3	Matching specification details with existing resources
		3.4	Following instructions
		3.5	Handling of drawing instruments
4.	Resource implications		The following resources should be provided:
		4.1	Workplace location or simulated work area
		4.2	Drawings and specification relevant to task
		4.3	Materials and instrument relevant to proposed activity
5.	Method of assessment		Competency in this Unit should be assessed through:
		5.1	Direct Observation
		5.2	Questions/Interview
		5.3	Written test related to underpinning knowledge
			Evidence provided for competency determination will be Valid, Sufficient & Current
6.	Context for assessment	6.1	Competency assessment may occur in the workplace or in any appropriate simulated environment
		6.2	Assessment shall be observed while task are being undertaken whether individually or in group
		6.3	Assessment must be undertaken in accordance with Lao PDR CBT assessment guidelines

UNIT 10 PERFORM MENSURATION AND CALCULATION

Unit Code	723.7231.122.003.01
Unit Descriptor	This unit covers the Skills, Knowledge and Attitudes required in identifying and measuring objects based on the required performance standards.

UNIT 10 Elements & Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA			
	Italicized terms as elaborated in the Rang of Variables			
Select measuring instruments	1.1 Object or component to be measured is identified, classified and interpreted according to the appropriate regular geometric shape and job requirements			
	1.2 Correct specifications are obtained from relevant sources			
	1.3 Appropriate measuring tools/ instruments are selected/identified as per object to be measured or job requirements			
Carry out measurements and	Accurate <i>measurements</i> are obtained according to job requirements			
calculations	2.2 Calculation needed to complete work tasks are performed using the four basic process of addition (+), subtraction (-), multiplication (x) and division (/) including but not limited to: trigonometric functions, algebraic computations			
	2.3 Calculations involving fractions, percentages and mixed numbers are used to complete workplace tasks			
	2.4 Numerical computation is self-checked and corrected for accuracy			
	2.5 Instruments are read to the limit of accuracy of the tool			
	2.6 Systems of measurement identified and converted according to job requirements/ISO			
	2.7 Object or component are measured according to job requirements			

UNIT 10 Range of Variables

	VARIABLES		RANGE
1.	Geometric shape		Including but is not limited to:
		1.1	Round
		1.2	Square
		1.3	Rectangular
		1.4	Triangle
		1.5	Sphere
		1.6	Conical
2.	Measuring instruments		Including but not limited to:
		2.1	Micrometer (In-out, depth)
		2.2	Vernier caliper (out, inside)
		2.3	Dial gauge
		2.4	Plastic gauge
		2.5	Straight edge
		2.6	Thickness gauge
		2.7	Torque gauge
		2.8	Telescopic gauge
		2.9	Try-square
		2.10	Protractor
		2.11	Combination gauge
		2.12	Steel rule
		2.13	Voltmeter
		2.14	Ammeter
		2.15	Ohmmeter
		2.16	Gauges (pressure and vacuum)
		2.17	Thermometers
3.	Measurements and		Kinds of part mensuration include:
	calculations	3.1	Linear
		3.2	Volume
		3.3	Area
		3.4	Wattage
		3.5	Voltage
		3.6	Resistance
		3.7	Amperage
		3.8	Frequency

	3.9 Impedance
	3.10 Displacement
	3.11 Inside diameter
	3.12 Outside diameter
	3.13 Circumference
	3.14 Length
	3.15 Thickness
	3.16 Taper
	3.17 Out of roundness
	3.18 End play/thrust clearance
4. Applications	Mensuration including but not limited to:
	4.1 Argo Machinery Mechanic and Repair
	4.2 Auto Mechanic and Repair
	4.3 Motorbike Mechanic and Repair
	4.4 Welding

UNIT 10 Evidence Guide

1.	Critical aspects of Competency		Assessment requires that the candidate:
		1.1	Selected and prepared appropriate measuring instruments in accordance with job requirements
		1.2	Performed measurements and calculations according to job requirements/ ISO
2.	Underpinning		TRADE MATHEMATICS / MENSURATION
	knowledge and attitudes	2.1	Four fundamental operation
		2.2	Linear measurement
		2.3	Dimensions
		2.4	Unit conversion
		2.5	Ratio and proportion
		2.6	Trigonometric functions
		2.7	Algebraic equations
3.	Underpinning skills	3.1	Performing calculation by addition, subtraction, multiplication and division; trigonometric functions and algebraic equations
		3.2	Visualizing objects and shapes
		3.3	Interpreting formulas for volume, areas, perimeters of plane and geometric figures
		3.4	Proper handling of measuring instruments

4.	Resource implications		The following resources should be provided:
		4.1	Workplace location or simulated work area
		4.2	Problems to solve
		4.3	Measuring instrument appropriate to carry out tasks
		4.4	Instructional materials relevant to the propose activity
		4.5	Assessment of underpinning knowledge and practical skills may be combined
5.	Method of assessment		Competency should be assessed through:
		5.1	Direct Observation on actual workplace
		5.2	Written test/questioning to underpinning knowledge
			Evidence provided for competency determination will be Valid, Sufficient & Current
6.	Context for assessment	6.1	Competency may be assessed on the job or simulated environment.
		6.2	Assessment shall be observed while task are being undertaken whether individually or in group
		6.3	Assessment must be undertaken in accordance with Lao PDR CBT assessment guidelines

UNIT 11 APPLY OCCUPATIONAL HEALTS & SAFETY REQUIERMENTS

Unit Code	723.7231.122.004.01				
Unit Descriptor	This unit of Competency covers the Skills, Knowledge and Attitudes for Occupational Health & Safety (OHS) within any sector of the automotive industry.				

UNIT 11 Elements & Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA		
	Italicized terms as elaborated in the Rang of Variables		
Identify & assess risks	1.1 Hazards in the work area are identified, assessed and reported to designated personnel.		
	1.2 Safety risks in the work area are identified, assessed and reported to designated personnel.		
	1.3 Safe work practices, duty of care requirements and safe work instructions are followed for controlling risks.		
	1.4 OHS, hazard, accident or incident reports are contributed to according to workplace procedures and National OHS legislation and relevant information		
Identify hazardous materials & other hazards	2.1 Hazardous materials on a work site are correctly identified and, if appropriate, handled and used according to company and legislated procedures.		
	2.2 Measures for controlling risks and construction hazards are applied effectively and immediately.		
	2.3 Hazardous materials that have safety implications for self and other workers are secured immediately they are identified, using appropriate signs and symbols.		
Plan & prepare for safe work practices	3.1 Correct personal protective equipment and clothing for each area of automotive work are identified, worn, correctly fitted, used and stored according to enterprise procedures.		
	3.2 Selection of tools, equipment and materials, and organization of tasks are performed in conjunction with other personnel on site and in accordance with enterprise procedures.		
	3.3 Required barricades and signage are determined and erected at the appropriate site location.		
	3.4 Material safety data sheets (MSDS), and job safety analysis (JSA) and safe work method statements relevant to the work to be carried out are identified		

			and applied
4.	Apply safe work practices	4.1	Tasks are performed in a manner that is safe for operators, other personnel and the general community in accordance with legislative requirements, and enterprise policies and procedures.
		4.2	Plant and equipment guards are used in accordance with manufacturer specifications, work site regulations & standards.
		4.3	Procedures and relevant authorities for reporting hazards, incidents and injuries are used.
		4.4	Work site safety signs and symbols are identified and followed.
		4.5	Work site area is cleared and maintained to prevent and protect self and others from incidents and accidents and to meet environmental requirements
5.	Follow emergency procedures	5.1	Designated personnel are identified in the event of an emergency for communication purposes.
		5.2	Safe workplace procedures for dealing with accidents, various types of fire and other emergencies are followed, including identification or use, if appropriate, of fire equipment within scope of responsibilities.
		5.3	Emergency response and evacuation procedures are known, practiced and carried out effectively when required.
		5.4	Emergency first aid treatment of minor injuries is carried out correctly and details of any treatment administered are reported accurately to designated personnel as soon as possible

UNIT 11 Range of Variables

VARIABLES		RANGE
1. Hazards		Hazards include but are not limited to;-
	1.1	Chemical spills
	1.2	Work in confined spaces
	1.3	Trenches, excavations, workshop pit
	1.4	Falling objects
	1.5	Gasses, fires
	1.6	Hazardous materials
	1.7	Extreme temperatures
	1.8	Infectious diseases

		1.9	Handling & moving equipment
		1.10	Overhanging, protruding, sharp objects
		1.11	Noise, dust, vapors
		1.12	Uncontrolled site traffic
		1.13	Working at heights
2.	Designated persons	2.1	Safety officers
		2.2	Managers, supervisors
		2.3	Materials handling licensed persons
3.	Safe work practices	3.1	Observing OHS practices
		3.2	Risk assessment & emergency procedures
		3.3	Use of fire-fighting equipment
4.	Duty of care	4.1	Protect others from harm
	requirements	4.2	National OHS regulations
5.	Incidents	5.1	Accidents resulting in personal injury, damage to property
		5.2	Events on site that require assessment and action
6.	OHS legislation,	6.1	Current National OHS regulations
	regulations and codes	6.2	Current Provincial OHS regulations
		6.3	Current enterprise safety policies and procedures
		6.4	Current Company/manufacturer/component supplier OHS manual/handbook/user guide requirements
7.	Information, signs &	7.1	Visual displayed symbols, tags, signs, instructions
	symbols	7.2	Event reporting documents
		7.3	Safety meeting records
8.	Hazardous materials	8.1	Petrol, diesel, gas fuel
		8.2	Exhaust gas
		8.3	Welding gas
		8.4	Oil
		8.5	Color
		8.6	Cleaning chemicals, solvents
		8.7	Glues
		8.8	Asbestos
9.	Risk control measures	9.1	Elimination, substitution, isolation
		9.2	Management control
		9.3	Personal Protective Equipment

10. Personal Protective Equipment (PPE)	Including but limited to: 10.1 Aprons, arm guards, caps, dust masks, respirators, ear muffs, ear plugs, gloves, hard hats, reflective vests, jackets, overalls, safety glasses & goggles, steel capped boots, UV protective clothing & sunscreen
11. Tools, equipment and materials	Including but not limited to: 11.1 Fire-fighting equipment 11.2 Breathing apparatus 11.3 First aid kit 11.4 Ladders & work platforms 11.5 PPE
12. Emergency procedures	Including but not limited to: 12.1 Contact numbers, names and locations 12.2 Procedures for local emergency services

UNIT 11 Evidence Guide

		,	
1.			Assessment requires evidence that the candidate:
		1.1	Locate, interpret & apply relevant information, standards & specifications
		1.2	Comply with a safety site plan & National & organizational OHS policy/procedures.
		1.3	Implement required safety actions relevant to a range of situations & in line with OHS policy and procedures
2.	Underpinning	2.1	Basic first aid procedures
	attitudes	2.2	OHS and Construction Terminology
		2.3	Knowledge of OHS communication & visual display methods including signage
		2.4	Emergency response & evacuation procedures
3.	Underpinning skills	3.1	Recognize & respond effectively to a range of hazardous situations in the required manner
	3.3	3.2	Deal with hazardous situations as part of a team
		3.3	Communicate & report hazards & risks using a range of technologies suitable to the work environment
		3.4	Identify & report faults in tools, equipment and facilities.
		3.5	Current OHS legislation & required safety clothing & equipment
		3.3	Deal with hazardous situations as part of a team Communicate & report hazards & risks using a range of technologies suitable to the work environment Identify & report faults in tools, equipment and facilities. Current OHS legislation & required safety clothing &

		3.6	Safe use of construction tools, materials & equipment
4.	Resource implications		The following resources should be provided:
		4.1	Induction procedures
		4.2	Realistic or simulated tasks covering mandatory OHS requirements
		4.3	Relevant specifications & work instructions
		4.4	Tools & equipment appropriate to applying safe work practices
		4.5	Support materials appropriate to activity
		4.6	Workplace instructions relating to safe work practices
		4.7	Material safety data sheets
		4.8	Research resources
5.	Method of assessment		Competency in this Unit should be assessed through:
		5.1	Satisfy endorsed Assessment guidelines
		5.2	Include direct task observation in real or simulated conditions
		5.3	Questioning to clarify competency observations
		5.4	Provide evidence that is Sufficient & Valid
		5.5	Take account of cultural, and disability variations
			Evidence provided for competency determination will be Valid, Sufficient & Current
6.	Context for assessment	6.1	Competency should be assessed in the workplace or simulated environment.
		6.2	Assessment must be undertaken in accordance with Lao PDR CBT assessment guidelines

UNIT 12 MOVE VEHICLE

Unit Code	723.7231.122.005.01
Unit Descriptor	This Unit covers the Skills, Knowledge and Attitudes required moving vehicles in a workshop.

UNIT 12 Elements & Performance Criteria

	ELEMENTS	PERFORMANCE CRITERIA Italicized terms as elaborated in the Rang of Variables	
		100	dicized terms as claborated in the rang or variables
1.	Prepare vehicle for moving	1.1	Nature and scope of work requirements are identified, interpreted and confirmed
		1.2	Plan, select and prepare task in accordance with OHS requirements and company/workshop standard operating procedures
		1.3	Correct check-up procedures performed based on vehicle manufacturer standard requirements and company/workshop standard operating procedures
2.	Move vehicle	2.1	Select and move vehicle to appropriate location in accordance with OHS requirements
		2.2	Park vehicle following parking safety techniques and procedure
		2.3	Perform final check to work requirements and external vehicle damages
3.	Restore work area and complete documentation	3.1 3.2	Restore and clean work area, tools and equipment. Complete and restore Documentation includes job cards, checklist, reports and workshop manuals.

UNIT 12 Range of Variables

VARIABLES	RANGE
1. Vehicles	1.1 Vehicles with manual transmission
	1.2 Vehicles with automatic transmission
	1.3 Agro-Machinery
	1.4 Motorbikes
2. Moving	Vehicle moving maybe includes:
	2.1 Driving
	2.2 Towing
	2.3 Pushing

52 MOVE VEHICLE

		2.4	Lifting
3.	Checkup procedure		Checkup procedures maybe includes:
		3.1	Oil level
		3.2	Brake fluid
		3.3	Clutch fluid
		3.4	Coolant level
		3.5	Battery (electrolyte)
		3.6	Tire pressure
		3.7	Position of driving gear
		3.8	Lighting and warning devices
4.	Parking safety		Parking safety techniques maybe includes:
	techniques	4.1	Vehicle parking position
		4.2	Vehicle lifting to manufacture requirements
		4.3	Engaging of Park brake
		4.4	Engaging of driving gear position
		4.5	Front wheel position

UNIT 12 Evidence Guide

1.	Critical aspects of Competency	1.1	Assessment requires evidence that the candidate: Selecting and used appropriate procedure, manuals, tools and equipment to carry out vehicle moving.	
		1.2	Conducting vehicle moving in accordance with workplace and company/manufacturer/component supplier requirements	
		1.3	Performing completed job documentation and work area restore	
2.	knowledge and attitudes 2.3 2.4 2.5 2.6 2.6 2.7 2.8	2.1	OHS requirements	
		2.2	Vehicle driving	
		2.3	Relevant company/workshop operating procedure	
		2.4	Relevant manual/handbook with vehicle moving specifications	
		2.5	Vehicle moving, positioning and lifting procedure	
		2.6	Hand/ power tools and workshop equipment for task	
		2.7	Dangers of working with lift equipment	
		2.8	Final inspection procedure	
		2.9	Workshop and Equipment maintenance	
		2.10	Company/workshop Documentation requirements	

MOVE VEHICLE 53

		1	
3.	Underpinning skills	3.1	Working safely
		3.2	Using Personal Protective Equipment
		3.3	Communication effectively
		3.4	Organizing materials to be used
		3.5	Using and interpreting manual/handbook for moving specification
		3.6	Ability to move/maneuvering vehicle
		3.7	Proper handling and use of tools and equipment
		3.8	Maintaining orderliness and cleanliness
		3.9	Maintaining customer records
4.	Resource implications		The following resources should be provided:
		4.1	Workplace location or simulated work area
		4.2	Appropriate vehicle for moving
		4.3	Appropriate tools and equipment to this task
		4.4	Materials relevant to the task
		4.5	Specifications and work instruction to the task
5.	Method of assessment		Competency should be assessed through:
		5.1	Direct Observation on actual workplace
		5.2	Questions to underpinning knowledge
		5.3	Demonstration on simulated situation
		5.4	Written/Oral examination
			Evidence provided for competency determination will be Valid, Sufficient & Current
6.	Context for assessment	6.1	Competency may be assessed on the job or simulated environment.
		6.2	The assessment of practical skills should be take place after a period of supervised practice and repetitive experience.
		6.3	Assessment must be undertaken in accordance with Lao PDR CBT assessment guidelines

54 MOVE VEHICLE

UNIT 13 MOUNT AND DEMOUNT SYSTEM COMPONENTS

Unit Code	723.7231.122.006.01
Unit Descriptor	This Unit covers the Skills, Knowledge and Attitudes required mounting and/or demounting system components.

UNIT 13 Elements & Performance Criteria

ELEMENTS		PERFORMANCE CRITERIA			
		Ita	licized terms as elaborated in the Rang of Variables		
	nt system	1.1	Nature and scope of work requirements are identified, interpreted and confirmed		
compon	nents	1.2	Plan, select and prepare tasks in accordance with OHS requirements and company/workshop standard operating procedures		
		1.3	Resources required to mount/demount system components are sourced. Work area, hand tools, equipment, maintenance specification data/manual/handbook and spare parts are identified and prepared		
2. Perform demour compon	nt system	2.1	Mount/demount system/components and test for correct operation in accordance with company/ manufacturer/component supplier specifications.		
		2.2	Removed/components are inspected in accordance with authorized procedures and inspection reports raised and processed.		
		2.3	Inspection of mounting points and fittings for damage and wear is completed without causing damage to any component or system		
		2.4	Tightening sequence, torque settings and spoke retensioning are completed in accordance with manufacturer/component supplier specifications and site procedures		
		2.5	Perform final inspection to ensure protective guards, safety features and cowlings are in place.		
		3.1	Restore and clean work area, tools and equipment.		
complet docume		3.2	Complete and restore Documentation includes job cards, checklist, reports and workshop manuals.		

UNIT 13 Range of Variables

	VARIABLES		RANGE
1. A	Applications		System/components may be fitted to:
		1.1	Vehicles
		1.2	Agro-Machinery
		1.3	Outdoor power equipment
		1.4	Marine craft
		1.5	Plant
2. F	aults		Faults on mounting points and fittings may include:
		2.1	Damage
		2.2	Wear
		2.3	Scratches
		2.4	Leak
3. lı	nspection procedure		Inspection procedure should be including:
		3.1	Aural, visual and functional assessments (including damage, corrosion, fluid levels, leaks, wear and safety aspects)
		3.2	Adjustment of System components
		3.3	Functional Test
4. N	Manuals and		Manuals and Information may include:
lı	nformation	4.1	Verbal or written and graphical instructions, signage, work schedules/plans/specifications
		4.2	Safe work procedures related to task
		4.3	Regulatory legislative requirements pertaining to the automotive industry including Lao Design Rules
		4.4	Company/manufacturer/component supplier service manual/handbook
		4.5	Company/manufacturer/component supplier specification data/manual/handbook
		4.6	Company/manufacturer/component supplier periodic service maintenance data manual/handbook
5. T	Tools and Equipment		Tools and Equipment may include:
		5.1	Hand tools
		5.2	Power tools
		5.3	Special tools for working task
		5.4	Torque wrench

6.	Company/ workshop standard operating procedures		Company/workshop standard operating procedures include:
		6.1	Verbal or written instructions issued by authorized personal
		6.2	Job order slip
		6.3	Spare parts ordering form
		6.4	Wearing of Personal Protective Equipment
7.	Occupational Health and Safety (OHS) requirements		OHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures, and may include:
		7.1	To conduct of operational risk assessment and treatments associated with Vehicular movements, hazardous substances, Electrical safety manual, lifting and shifting working in proximity to others a site visitors
		7.2	Use of personal protective equipment that include prescribed under legislation regulations codes of practice and workplace policies and practice

UNIT 13 Evidence Guide

1.	Critical aspects of Competency		Assessment requires evidence that the candidate:	
		1.1	Selecting and used appropriate procedure, manuals, tools and equipment to mount/demount system/components.	
		1.2	Perform mount/demount system/components in accordance with workplace and company/ manufacturer/component supplier requirements	
		1.3	Performing completed job documentation and work area restore	
2.	Underpinning knowledge and attitudes	2.1	OHS requirements	
		2.2	Relevant company/workshop operating procedure	
		2.3	Relevant manual/handbook with mount/demount specifications	
		2.4	System/components mount/demount procedure	
		2.5	Appropriate sealant/adhesive	
		2.6	Hand/ power tools and workshop equipment for task	
		2.7	Final inspection procedure	
		2.8	Workshop and Equipment maintenance	
		2.9	Company/workshop Documentation requirements	

3. Underpinning skills	3.1 Working safely
	3.2 Using Personal Protective Equipment
	3.3 Communication effectively
	3.4 Organizing materials to be used
	3.5 Using and interpreting manual/handbook for mount/ demount specifications
	3.6 Proper handling and use of tools and equipment
	3.7 Mounting and demounting system/components
	3.8 Using of appropriate sealant/adhesive
	3.9 Maintaining orderliness and cleanliness
	3.10 Maintaining customer records
4. Resource implications	The following resources should be provided:
	4.1 Workplace location or simulated work area
	4.2 Appropriate vehicle for moving
	4.3 Appropriate tools and equipment to this task
	4.4 Materials relevant to the task
	4.5 Specifications and work instruction to the task
5. Method of assessment	Competency in this Unit should be assessed through:
	5.1 Direct Observation on actual workplace
	5.2 Questions to underpinning knowledge
	5.3 Demonstration on simulated situation
	5.4 Written/Oral examination
	Evidence provided for competency determination will be Valid, Sufficient & Current
6. Context for assessment	6.1 Competency may be assessed on the job or simulated environment.
	6.2 The assessment of practical skills should be take place after a period of supervised practice and repetitive experience.
	6.3 Assessment must be undertaken in accordance with Lao PDR CBT assessment guidelines

UNIT 14 PERFORM PERIODICAL MAINTENANCE

Unit Code	723.7231.132.007.01
Unit Descriptor	This Unit covers the Skills, Knowledge and Attitudes required carrying out scheduled periodic maintenance to vehicle, tools and equipment based on the required performance standards.

UNIT 14 Elements & Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
	Italicized terms as elaborated in the Rang of Variables
Prepare to carry out scheduled periodic	1.1 Nature and scope of work requirements are identified, interpreted and confirmed
maintenance	1.2 Plan, select and prepare tasks in accordance with OHS requirements and company/workshop standard operating procedures
	1.3 Resources required to carry out scheduled periodic maintenance are sourced. Work area, hand tools, equipment, maintenance specification data/manual/handbook and spare parts are identified and prepared
Diagnose a vehicle/ tools/equipment	2.1 Vehicle/ tools/equipment system/components are diagnosed in accordance with company/manufacturer/component supplier maintenance manual requirements
	2.2 Results are documented and Report is forwarded to persons for action in accordance with workplace procedures
Carry out scheduled periodic maintenance	3.1 Carry out scheduled periodic maintenance to vehicle/ tools/equipment system/components and perform test for correct operation accordance with company/manufacturer/component supplier specifications
	3.2 Adjustments made during the maintenance are in accordance with manufacturer/component supplier specifications.
	3.3 Perform final inspection to ensure protective guards, safety features and cowlings are in place.
4. Restore work area and	4.1 Restore and clean work area, tools and equipment.
complete documentation	4.2 Complete and restore Documentation includes job cards, check list, reports and workshop manuals.

UNIT 14 Range of Variables

	VARIABLES		RANGE
1.	Maintenance task/		Maintenance may include:
	components	1.1	Lubrication intervals
		1.2	Filter replacement
		1.3	Components clearance check
		1.4	Components cleaning
		1.5	Components adjustment
		1.6	Wear check
			Vehicle:
		1.7	Engine Components
		1.8	Cassie components
		1.9	Electrical components
			Workshop:
		1.10	Tools
		1.11	Equipment
		1.12	Test Equipment
2.	Applications		Maintenance components may be fitted to:
		2.1	Light vehicles
		2.2	Agro-Machinery
		2.3	Outdoor power equipment
		2.4	Marine craft
		2.5	Plant
		2.6	Workshop facility
3.	Manuals and		Manuals and Information may include:
	Information	3.1	Verbal or written and graphical instructions, signage, work schedules/plans/specifications
		3.2	Safe work procedures related to task
		3.3	Regulatory legislative requirements pertaining to the automotive industry including Lao Design Rules
		3.4	Company/manufacturer/component supplier maintenance and specification data/manual/handbook
		3.5	Company/manufacturer/component supplier periodic service maintenance data manual/handbook

4.	Tools and Equipment		Tools and Equipment may include:
		4.1	Hand tools
		4.2	Power tools
		4.3	Measuring instruments (Vernier, micrometer, telescope gauge, dial tester indicator, plastic- gauge, torque wrench, feeler gauge)
		4.4	Engine lifting device
		4.5	Two post vehicle lift or long floor jack and support stand set
		4.6	Lubricant dispensing equipment
		4.7	Cleaning Tools and Material
5.	Company/ workshop standard operating procedures		Company/workshop standard operating procedures include:
		5.1	Verbal or written instructions issued by authorized personal
		5.2	Job order slip
		5.3	Spare parts ordering form
		5.4	Periodic maintenance schedule plan/form
		5.5	Wearing of Personal Protective Equipment
6.	Occupational Health and Safety (OHS) requirements		OHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures, and may include:
		6.1	To conduct of operational risk assessment and treatments associated with Vehicular movements, hazardous substances, Electrical safety manual, lifting and shifting working in proximity to others a site visitors
		6.2	Use of personal protective equipment that include prescribed under legislation regulations codes of practice and workplace policies and practice

UNIT 14 Evidence Guide

Critical aspects of Competency	1.1	Assessment requires evidence that the candidate: Selecting and used appropriate procedure, manuals, tools and equipment to carry out task
	1.2	Diagnosing and used method for system/components test in reference to company/manufacturer/component supplier repair requirements
	1.3	Conducting the maintenance to system/ components

			in accordance with workplace and company/manufacturer/component supplier requirements
		1.4	Performing completed job documentation and work area restore
2.	Underpinning	2.1	OHS requirements
	knowledge and attitudes	2.2	Relevant company/workshop operating procedure
	attitudes	2.3	Relevant maintenance specification data/manual/handbook
		2.4	Operation and function to maintained vehicle and workshop system/components
		2.5	Mechanic/ technic units of measurement
		2.6	Maintenance diagnosis procedure for vehicle and workshops
		2.7	Maintenance procedure for vehicle and workshops
		2.8	Hand/ power tools and workshop Equipment for task
		2.9	Relevant Test equipment for task
		2.10	Dangers of working with test equipment
		2.11	Vehicle moving, positioning and lifting for task
			Final inspection procedure
		2.13	Company/workshop Documentation requirements
3.	Underpinning skills	3.1	Working safely
		3.2	Using Personal Protective Equipment
		3.3 3.4	Communication effectively
		3.4 3.5	Organizing materials to be used Using and interpreting maintenance specification
		5.5	data/manual/handbook
		3.6	Proper handling and use of tools and equipment
		3.7	Mounting and demount system components
		3.8	Using test equipment for task
		3.9	Maintaining orderliness and cleanliness
		3.10	Maintaining customer records
4.	Resource implications		The following resources should be provided:
		4.1	Workplace location or simulated work area
		4.2	Appropriate tools and equipment to this task
		4.3	Materials relevant to the task
		4.4	Specifications and work instruction to the task

5.	Method of assessment		Competency in this Unit should be assessed through:
		5.1	Direct Observation on actual workplace
		5.2	Questions to underpinning knowledge
		5.3	Demonstration on simulated situation
		5.4	Written/Oral examination
			Evidence provided for competency determination will be Valid, Sufficient & Current
6.	Context for assessment	6.1	Competency should be assessed on the job or simulated environment.
		6.2	Assessment must be undertaken in accordance with Lao PDR CBT assessment guidelines

G CORE UNITS OF COMPETENCY

<u>E</u>

Competency Standard: AUTOMOTIVE SERVICE & REPAIR III Job Title: MOTORBIKE MECHANICS
Strengthening Technical and Vocational Education and Training (STVET) Project ADB Grant 0211-LAO

UNIT 15 REPAIR BRAKE SYSTEM

Unit Code	723.7231.433.001.01
Unit Descriptor	This Unit covers the Skills, Knowledge and Attitudes required to repair light vehicle mechanical and hydraulic brake system/components to manufacture specifications.

UNIT 15 Elements & Performance Criteria

ELEMENTS		PERFORMANCE CRITERIA		
		Italicized terms as elaborated in the Rang of Variables		
1.	Prepare to repair brake/ system components	1.1 Nature and scope of work requirements are identified, interpreted and confirmed		
		1.2 Plan, select and prepare tasks in accordance with OHS requirements and company/workshop standard operating procedures		
		1.3 Resources required for repairing are sourced. Work area, hand tools, equipment, repair specification data/manual/handbook and spare parts are identified and prepared		
2.	Diagnose a brake system	2.1 Brake system/components are diagnosed in accordance with company/manufacturer/component supplier repair manual requirements		
		2.2 Results are documented and Report is forwarded to persons for action in accordance with workplace procedures		
3.	Repair brake system/ components	3.1 Repair to brake system/components and test for correct operation are carried out in accordance with company/manufacturer/component supplier specifications		
		3.2 Adjustments made during the repair are in accordance with manufacturer/component supplier specifications.		
		3.3 Prepare vehicle for test drive, including final inspection to ensure protective guards, safety features and cowlings are in place.		
4.	Restore work area and	4.1 Restore and clean work area, tools and equipment.		
	complete documentation	4.2 Complete and restore Documentation includes job cards, check list, reports and workshop manuals.		

UNIT 15 Range of Variables

	VARIABLES		RANGE
1.	Brake system		Systems include:
		1.1	Mechanical and hydraulic Drum Brakes
		1.2	Hydraulic Disc Brakes
2.	System components		Components may include:
		2.1	Brake booster
		2.2	Brake master cylinder
		2.3	Brake slave cylinder
		2.4	Brake drum
		2.5	Hand brake
		2.6	Hand brake cable
		2.7	Brake shoes/ pads
		2.8	Brake pipe/ hose
		2.9	Brake disc
		2.10	Brake caliper
		2.11	Brake light switch
		2.12	Brake fluids DOT 3 / DOT 4
3.	Applications		System may be fitted to:
		3.1	Light Vehicles (including motorbikes)
		3.2	Agro-Machinery
4.	Faults		Faults may include:
		4.1	Low brake fluid
		4.2	Brake pedal pulsation
		4.3	Low, spongy or soft brake pedal
		4.4	Hard brake pedal
		4.5	Scraping noise from Brakes
		4.6	Brake squeal
		4.7	Brakes pull to one side
		4.8	Leaks
5.	Repair Methods		Repair methods are to include:
		5.1	Aural, visual and functional assessments (including damage, corrosion, fluid levels, leaks, wear and safety aspects)
		5.2	Diagnosis of Brake system/components
		5.3	Adjustment of System components

		- A	Duelle existenciale e d'orn
		5.4	Brake system bleeding
		5.5	Static and dynamic functional Brake Test
6.	Manuals and Information		Manuals and Information may include:
		6.1	Verbal or written and graphical instructions, signage, work schedules/plans/specifications
		6.2	Safe work procedures related to task
		6.3	Regulatory legislative requirements pertaining to the automotive industry including Lao Design Rules
		6.4	Company/manufacturer/component supplier repair manual/handbook
		6.5	Company/manufacturer/component supplier specification data/manual/handbook
		6.6	Company/manufacturer/component supplier Periodic Service Maintenance Data manual/handbook
7.	Tools and Equipment		Tools and Equipment may include:
	— — — — —	7.1	Hand tools
		7.2	Power tools
			Special tools:
		7.3	Vacuum gauge
		7.4	Pressure gauge kit
		7.5	Outside micrometer
		7.6	Brake fluid changer/ tank
		7.7	Two post vehicle lift or long floor jack and support stand set
		7.8	Roller brake test analyzer
8.	Company/ workshop standard operating		Company/workshop standard operating procedures include:
	procedures	8.1	Verbal or written instructions issued by authorized personal
		8.2	Job order slip
		8.3	Spare parts ordering form
		8.4	Wearing of Personal Protective Equipment
9.	Occupational Health and Safety (OHS) requirements		OHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures, and may include:
		9.1	To conduct of operational risk assessment and treatments associated with Vehicular movements, hazardous substances, Electrical safety manual, lifting and shifting working in proximity to others a site

	visitors
9.2	Use of personal protective equipment that include prescribed under legislation regulations codes of practice and workplace policies and practice

UNIT 15 Evidence Guide

	A Children and the state of the			
	1.2		Assessment requires evidence that the candidate:	
		1.1	Selecting and used appropriate procedure, manuals, tools and equipment to carry out task	
		1.2	Diagnosing and used method for brake system test in reference to company/manufacturer/component supplier repair requirements	
		1.3	Conducting the repair of a brake system/ components in accordance with workplace and company/manufacturer/component supplier requirements	
		1.4	Performing completed job documentation and work area restore	
	knowledge and attitudes 2.2 2.3 2.4 2.5 2.6 2.7 2.8 2.9 2.1 2.1 2.1	2.1	OHS requirements	
		2.2	Relevant company/workshop operating procedure	
		2.3	Relevant repair specification data/manual/handbook	
		2.4	Mechanical and hydraulic brake system and components	
		2.5	Brake system/ components diagnosis procedure	
		2.6	Brake system/ components repair procedure	
		2.72.8	Hand/ power tools and workshop Equipment for task Relevant Test equipment for task	
		2.9	Dangers of working with Brake test equipment	
		2.10	Vehicle moving, positioning and lifting for task	
		2.11	Final inspection procedure	
		2.12	Workshop and Equipment maintenance	
		2.13	Company/workshop Documentation requirements	
3.	3.3 3.4	3.1	Working safely	
		3.2	Using Personal Protective Equipment	
		3.3	Communication effectively	
		3.4	Organizing materials to be used	
		3.5	Using and interpreting repair specification data/manual/handbook	

	3.6	Proper handling and use of tools and equipment
	3.7	Mounting and demount System components
	3.8	Using test equipment for task
	3.9	Maintaining orderliness and cleanliness
	3.10	Maintaining customer records
4. Resource implications		The following resources should be provided:
	4.1	Workplace location or simulated work area
	4.2	Appropriate tools and equipment to this task
	4.3	Materials relevant to the task
	4.4	Specifications and work instruction to the task
5. Method of assessment		Competency in this Unit may be assessed through:
	5.1	Direct Observation on actual workplace
	5.2	Questions to underpinning knowledge
	5.3	Demonstration on simulated situation
	5.4	Written/Oral examination
		Evidence provided for competency determination will be Valid, Sufficient & Current
Context for assessment	6.1	Competency may be assessed on the job or simulated environment.
	6.2	The assessment of practical skills should be take place after a period of supervised practice and repetitive experience.
	6.3	Assessment must be undertaken in accordance with Lao PDR CBT assessment guidelines

UNIT 16 REPAIR WHEEL AND TIRES (MOTORBIKE)

Unit Code	723.7231.433.002.01
Unit Descriptor	This Unit covers the Skills, Knowledge and Attitudes required diagnosing and repairing wheel and tires for motorbikes. It includes also tube vulcanization and wheel balance.

UNIT 16 Elements & Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
	Italicized terms as elaborated in the Rang of Variables
Prepare to repair wheel and tires	1.1 Nature and scope of work requirements are identified, interpreted and confirmed
	1.2 Plan, select and prepare tasks in accordance with OHS requirements and company/workshop standard operating procedures
	1.3 Resources required for repairing are sourced. Work area, hand tools, equipment, repair specification data/manual/handbook and spare parts are identified and prepared
Diagnose wheel and tires	2.1 Motorbike wheel and tires are diagnosed in accordance with company/manufacturer/component supplier repair manual requirements
	2.2 Results are documented and Report is forwarded to persons for action in accordance with workplace procedures
Repair and balance wheel and tires	3.1 Repair to motorbike wheel and tires and test for correct operation are carried out in accordance with company/manufacturer/component supplier specifications
	3.2 Adjustments made during the repair are in accordance with manufacturer/component supplier specifications
	3.3 Balancing the wheel in accordance with company/manufacturer/component supplier specifications
	3.4 Prepare motorbike for test drive, including final inspection to ensure protective guards, safety features and cowlings are in place.
4. Restore work area and	4.1 Restore and clean work area, tools and equipment.
complete documentation	4.2 Complete and restore Documentation includes job cards, check list, reports and workshop manuals.

UNIT 16 Range of Variables

	VARIABLES		RANGE
1.	Wheel and tires types	1.1 1.2 1.3 1.4	Types include: Tube tires Tubeless tiers Steel rim Magnesium alloy rim
2.	System components	2.1 2.2 2.3 2.4	Components may include: Tube Rim Spoked wheel Wheel bearing
3.	Applications	3.1 3.2	System may be fitted to: Motorbike Sidecar
4.	Faults	4.1 4.2 4.3	Faults may include: Tire pressure Tire tread wear defects and abnormality Noise and rolling rumble noticed with wheel speed
5.	Repair Methods	5.1 5.2 5.3 5.4 5.5	Repair methods are to include: Aural, visual and functional assessments (including damage, corrosion, fluid levels, leaks, wear and safety aspects) Diagnosis of Wheel and Tire components Adjustment of Wheel components Static and/or dynamic wheel balancing Road Test drive
6.	Manuals and Information	6.1 6.2 6.3 6.4 6.5	Manuals and Information may include: Verbal or written and graphical instructions, signage, work schedules/plans/specifications Safe work procedures related to task Regulatory legislative requirements pertaining to the automotive industry including Lao Design Rules Company/manufacturer/component supplier repair manual/handbook Company/manufacturer/component supplier

		1	
			specification data/manual/handbook
		6.6	Company/manufacturer/component supplier Periodic Service Maintenance Data manual/handbook
7.	Tools and Equipment		Tools and Equipment may include:
		7.1	Hand tools
		7.2	Power tools
		7.3	Tire pressure gauge
		7.4	Torque wrench
		7.5	Spoke wrench
		7.6	Dial tester indicator
		7.7	Support stand set
		7.8	Tube vulcanizing machine
		7.9	Wheel Truing & Balancing Stand
8.			Company/workshop standard operating procedures include:
		8.1	Verbal or written instructions issued by authorized personal
		8.2	Job order slip
		8.3	Spare parts ordering form
		8.4	Wearing of Personal Protective Equipment
9.	Occupational Health and Safety (OHS) requirements		OHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures, and may include:
		9.1	To conduct of operational risk assessment and treatments associated with Vehicular movements, hazardous substances, Electrical safety manual, lifting and shifting working in proximity to others a site visitors
		9.2	Use of personal protective equipment that include prescribed under legislation regulations codes of practice and workplace policies and practice

UNIT 16 Evidence Guide

Critical aspects of Competency	Assessment requires evidence that the candidate: 1.1 Selecting and used appropriate procedure, manuals, tools and equipment to carry out task
	1.2 Diagnosing and used method for wheel and tire test in reference to company/manufacturer/component

			supplier repair requirements
		1.3	Conducting the repair and Balance of wheel and tire components in accordance with workplace and company/manufacturer/component supplier requirements Performing completed job documentation and work area restore
2.	Underpinning knowledge and attitudes	2.1 2.2 2.3 2.4	OHS requirements Relevant company/workshop operating procedure Relevant repair specification data/manual/handbook Wheel and tire system types and components
		2.5	Wheel and tire components diagnosis procedure
		2.6 2.7	Wheel and tire components repair procedure
		2.7	Hand/ power tools and workshop Equipment for task Relevant Test equipment for task
		2.9	Dangers of working with wheel and tire Balance equipment
		2.10	Vehicle moving, positioning and lifting for task
		2.11	Final inspection procedure
		2.12	Workshop and Equipment maintenance
		2.13	Company/workshop Documentation requirements
3.	Underpinning skills	3.1	Working safely
		3.2	Using Personal Protective Equipment
		3.3	Communication effectively
		3.4	Organizing materials to be used
			-
		3.4	Organizing materials to be used Using and interpreting repair specification data/manual/handbook Applying metric and inch size
		3.4 3.5 3.6 3.7	Organizing materials to be used Using and interpreting repair specification data/manual/handbook Applying metric and inch size Proper handling and use of tools and equipment
		3.4 3.5 3.6 3.7 3.8	Organizing materials to be used Using and interpreting repair specification data/manual/handbook Applying metric and inch size Proper handling and use of tools and equipment Mounting and demount wheel and tire components
		3.4 3.5 3.6 3.7 3.8 3.9	Organizing materials to be used Using and interpreting repair specification data/manual/handbook Applying metric and inch size Proper handling and use of tools and equipment Mounting and demount wheel and tire components Using test equipment for task
		3.4 3.5 3.6 3.7 3.8 3.9 3.10	Organizing materials to be used Using and interpreting repair specification data/manual/handbook Applying metric and inch size Proper handling and use of tools and equipment Mounting and demount wheel and tire components Using test equipment for task Maintaining orderliness and cleanliness
		3.4 3.5 3.6 3.7 3.8 3.9	Organizing materials to be used Using and interpreting repair specification data/manual/handbook Applying metric and inch size Proper handling and use of tools and equipment Mounting and demount wheel and tire components Using test equipment for task Maintaining orderliness and cleanliness Maintaining customer records
4.	Resource implications	3.4 3.5 3.6 3.7 3.8 3.9 3.10 3.11	Organizing materials to be used Using and interpreting repair specification data/manual/handbook Applying metric and inch size Proper handling and use of tools and equipment Mounting and demount wheel and tire components Using test equipment for task Maintaining orderliness and cleanliness Maintaining customer records The following resources should be provided:
4.	Resource implications	3.4 3.5 3.6 3.7 3.8 3.9 3.10 3.11	Organizing materials to be used Using and interpreting repair specification data/manual/handbook Applying metric and inch size Proper handling and use of tools and equipment Mounting and demount wheel and tire components Using test equipment for task Maintaining orderliness and cleanliness Maintaining customer records The following resources should be provided: Workplace location or simulated work area
4.	Resource implications	3.4 3.5 3.6 3.7 3.8 3.9 3.10 3.11	Organizing materials to be used Using and interpreting repair specification data/manual/handbook Applying metric and inch size Proper handling and use of tools and equipment Mounting and demount wheel and tire components Using test equipment for task Maintaining orderliness and cleanliness Maintaining customer records The following resources should be provided:

		4.4	Specifications and work instruction to the task
5.	Method of assessment		Competency in this Unit should be assessed through:
		5.1	Direct Observation on actual workplace
		5.2	Questions to underpinning knowledge
		5.3	Demonstration on simulated situation
		5.4	Written/Oral examination
			Evidence provided for competency determination will be Valid, Sufficient & Current
6.	Context for assessment	6.1	Competency may be assessed on the job or simulated environment.
		6.2	The assessment of practical skills should be take place after a period of supervised practice and repetitive experience.
		6.3	Assessment must be undertaken in accordance with Lao PDR CBT assessment guidelines

UNIT 17 REPAIR FINAL DRIVE (MOTORBIKE)

Unit Code	723.7231.433.003.01
Unit Descriptor	This Unit covers the Skills, Knowledge and Attitudes required repairing a motorbike final drive system.

UNIT 17 Elements & Performance Criteria

	ELEMENTS	PERFORMANCE CRITERIA			
		Italicized terms as elaborated in the Rang of Variables			
1.	drive system/	1.1 Nature and scope of work requirements are identified, interpreted and confirmed			
components	components	1.2 Plan, select and prepare tasks in accordance with OHS requirements and company/workshop standard operating procedures			
		1.3 Resources required for repairing are sourced. Work area, hand tools, equipment, repair specification data/manual/handbook and spare parts are identified and prepared			
2.	Diagnose a final drive system	2.1 Final drive system/components are diagnosed in accordance with company/manufacturer/component supplier repair manual requirements			
		2.2 Results are documented and Report is forwarded to persons for action in accordance with workplace procedures			
3.	Repair final drive system/ components	3.1 Repair final drive system/components and test for correct operation in accordance with company/manufacturer/component supplier specifications			
		3.2 Adjustments made during the repair are in accordance with manufacturer/component supplier specifications			
		3.3 Prepare vehicle for test drive, including final inspection to ensure protective guards, safety features and cowlings are in place.			
4.	Restore work area and complete documentation	4.1 Restore and clean work area, tools and equipment.4.2 Complete and restore Documentation includes job cards, check list, reports and workshop manuals.			

UNIT 17 Range of Variables

	VARIABLES	RANGE
1.	Final Drive System	Systems include: 1.1 Chain, 1.2 Belt or 1.3 Shaft final-drive systems
2.	System Components	Components may include: 2.1 Drive chain or Drive Belt or Drive shaft 2.2 Clutch hub 2.3 Tensioner buffer / damper 2.4 Sprocket 2.5 Chain puller 2.6 Chain master link clip 2.7 Centrifugal Pulley 2.8 Cross joint 2.9 Slip joint 2.10 Dive shaft rear wheel assembly bearing 2.11 Gear oil
3.	Applications	System may be fitted to: 3.1 Motorbikes
4.	Faults	Faults may include: 4.1 Abnormal noises 4.2 Vibrations 4.3 Loss of drive 4.4 Oil leaks 4.5 Failure to operate
5.	Repair Methods	 Repair methods are to include: 5.1 Aural, visual and functional assessments (including damage, corrosion, fluid levels, leaks, wear and safety aspects) 5.2 Diagnosis of final drive system/components 5.3 Adjustment of System components 5.4 Road Test Drive
6.	Manuals and Information	Manuals and Information may include: 6.1 Verbal or written and graphical instructions, signage, work schedules/plans/specifications

6.2 Safe work procedures related to task 6.3 Regulatory legislative requirements pertaining to the automotive industry including Lao Design Rules 6.4 Company/manufacturer/component supplier repair manual/handbook 6.5 Company/manufacturer/component supplier specification data/manual/handbook 6.6 Company/manufacturer/component supplier Periodic Service Maintenance Data manual/handbook 7. UNIT 17 Evidence Guide

1.	Critical aspects of		Assessment requires evidence that the candidate:
	Competency	1.1	Selecting and used appropriate procedure, manuals, tools and equipment to carry out task
		1.2	Diagnosing and used method for final drive system test in reference to company/manufacturer/component supplier repair requirements
		1.3	Conducting the repair of a final drive system/ components in accordance with workplace and company/manufacturer/component supplier requirements
		1.4	Performing completed job documentation and work area restore
2.	Underpinning	2.1	OHS requirements
	knowledge and attitudes	2.2	Relevant company/workshop operating procedure
	attitudes	2.3	Relevant repair specification data/manual/handbook
		2.4	Final drive system and components
		2.5	Final drive system/ components diagnosis procedure
		2.6	Final drive system/ components repair procedure
		2.7	Hand/ power tools and workshop Equipment for task
		2.8	Vehicle moving, positioning and lifting for task
		2.9	Final inspection procedure
			Workshop and Equipment maintenance
		2.11	Company/workshop Documentation requirements
3.	Underpinning skills	3.1	Working safely
		3.2	Using Personal Protective Equipment
		3.3	Communication effectively
		3.4	Organizing materials to be used
		3.5	Using and interpreting repair specification data/manual/handbook
		3.6	Proper handling and use of tools and equipment
		3.7	Mounting and demount System components
		3.8	Using test equipment for task
		3.9	Maintaining orderliness and cleanliness
		3.10	Maintaining customer records
4.	Resource implications		The following resources should be provided:
		4.1	Workplace location or simulated work area
		4.2	Appropriate tools and equipment to this task

		4.3 4.4	Materials relevant to the task Specifications and work instruction to the task
5.	Method of assessment	5.1 5.2 5.3 5.4	Competency in this Unit should be assessed through: Direct Observation on actual workplace Questions to underpinning knowledge Demonstration on simulated situation Written/Oral examination Evidence provided for competency determination will be Valid, Sufficient & Current
6.	Context for assessment	6.1 6.2 6.3	Competency may be assessed on the job or simulated environment. The assessment of practical skills should be take place after a period of supervised practice and repetitive experience. Assessment must be undertaken in accordance with Lao PDR CBT assessment guidelines

UNIT 18 REPAIR SMALL ENGINE

Unit Code	723.7231.233.004.01
Unit Descriptor	This Unit covers the Skills, Knowledge and Attitudes required repairing small engines. These include two and four stroke spark ignition and/or two and four stroke compression ignition engines.

UNIT 18 Elements & Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA			
	Italicized terms as elaborated in the Rang of Variables			
Prepare to repair small engine system/	1.1 Nature and scope of work requirements are identified, interpreted and confirmed			
components	1.2 Plan, select and prepare tasks in accordance with OHS requirements and company/workshop standard operating procedures			
	1.3 Resources required for repairing are sourced. Work area, hand tools, equipment, repair specification data/manual/handbook and spare parts are identified and prepared			
Diagnose a small engine system	2.1 Small engine system/components are diagnosed in accordance with company/manufacturer/component supplier repair manual requirements			
	2.2 Results are documented and Report is forwarded to persons for action in accordance with workplace procedures			
Repair small engine system components	3.1 Repair small engine system/components and test for correct operation in accordance with company/manufacturer/component supplier specifications			
	3.2 Adjustments made during the repair are in accordance with manufacturer/component supplier specifications			
	3.3 Prepare vehicle for test drive, including final inspection to ensure protective guards, safety features and cowlings are in place.			
4. Restore work area and	4.1 Restore and clean work area, tools and equipment.			
complete documentation	4.2 Complete and restore Documentation includes job cards, check list, reports and workshop manuals.			

REPAIR SMALL ENGINE 81

UNIT 18 Range of Variables

	VARIABLES		RANGE
1.	Small Engine System		Systems include:
		1.1	Two and four stroke spark ignition
		1.2	Two and four stroke compression ignition
		1.3	One to four Cylinder Engines up to 1500cc displacement
2.	System components		Components may include:
		2.1	Cylinder
		2.2	Cylinder head
		2.3	Piston and piston rings
		2.4	Valve assembly
		2.5	Crankshaft assembly
		2.6	Connecting rod
		2.7	Crankshaft and connecting bearing
		2.8	Distribution chain assembly
		2.9	Engine oil pump
		2.10	Oil mixing pump (Two stroke engine)
3.	Applications		System may be fitted to:
		3.1	Light vehicles
		3.2	Agro-Machinery
		3.3	Outdoor power equipment
		3.4	Marine craft
		3.5	Plant
4.	Faults		Faults may include:
		4.1	Poor engine performance/ power
		4.2	Engine won't start,
		4.3	Runs poorly,
		4.4	Will not idle smoothly
		4.5	Engine leaks
5.	Repair Methods		Repair methods are to include:
		5.1	Aural, visual and functional assessments (including damage, corrosion, fluid levels, leaks, wear and safety aspects)
		5.2	Diagnosis of small engine system/components
		5.3	Removal, dismantling, reassembly, refitting

82

		5.4	Adjusting and testing
6.	Manuals and		Manuals and Information may include:
0.	Information	6.1	Verbal or written and graphical instructions, signage, work schedules/plans/specifications
		6.2	Safe work procedures related to task
		6.3	Regulatory legislative requirements pertaining to the automotive industry including Lao Design Rules
		6.4	Company/manufacturer/component supplier repair manual/handbook
		6.5	Company/manufacturer/component supplier specification data/manual/handbook
		6.6	Company/manufacturer/component supplier Periodic Service Maintenance Data manual/handbook
7.	Tools and Equipment		Tools and Equipment may include:
		7.1	Hand tools
		7.2	Power tools
		7.3	Measuring instruments (Vernier, micrometer, telescope gauge, dial tester indicator, plastic- gauge, torque wrench, feeler gauge)
		7.4	Engine lifting device
		7.5	Two post vehicle lift or long floor jack and support stand set
		7.6	Lubricant dispensing equipment
8.	Company/ workshop standard operating		Company/workshop standard operating procedures include:
	procedures	8.1	Verbal or written instructions issued by authorized personal
		8.2	Job order slip
		8.3	Spare parts ordering form
		8.4	Wearing of Personal Protective Equipment
9.	Occupational Health and Safety (OHS) requirements		OHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures, and may include:
		9.1	To conduct of operational risk assessment and treatments associated with Vehicular movements, hazardous substances, Electrical safety manual, lifting and shifting working in proximity to others a site visitors
		9.2	Use of personal protective equipment that include

REPAIR SMALL ENGINE 83

prescribed under legislation regulations codes of
practice and workplace policies and practice

UNIT 18 Evidence Guide

1.	Critical aspects of		Assessment requires evidence that the candidate:
	Competency	1.1	Selecting and used appropriate procedure, manuals, tools and equipment to carry out task
		1.2	Diagnosing and used method for small engine test in reference to company/manufacturer/component supplier repair requirements
		1.3	Conducting the repair of a small engine system/ components in accordance with workplace and company/manufacturer/component supplier requirements
		1.4	Performing completed job documentation and work area restore
2.	Underpinning	2.1	OHS requirements
	knowledge and	2.2	Relevant company/workshop operating procedure
	attitudes	2.3	Relevant repair specification data/manual/handbook
		2.4	Two and four stroke engine system and components
		2.5	Spark and compression ignition system components
		2.6	Engine lubrication system
		2.7	Engine cooling system
		2.8	Small engine system/ components diagnosis procedure
		2.9	Small engine system/ components repair procedure
		2.10	Hand/ power tools and workshop Equipment for task
		2.11	Relevant Test equipment for task
		2.12	Dangers of working with test equipment on running engines
		2.13	Vehicle moving, positioning and lifting for task
		2.14	Final inspection procedure
		2.15	Workshop and Equipment maintenance
		2.16	Company/workshop Documentation requirements
3.	Underpinning skills	3.1	Working safely
		3.2	Using Personal Protective Equipment
		3.3	Communication effectively
		3.4	Organizing materials to be used

		3.5	Using and interpreting repair specification data/manual/handbook
		3.6	Proper handling and use of tools and equipment
		3.7	Mounting and demount System components
		3.8	Using, handling and interpreting test equipment for task
		3.9	Maintaining orderliness and cleanliness
		3.10	Maintaining customer records
4.	Resource implications		The following resources should be provided:
		4.1	Workplace location or simulated work area
		4.2	Appropriate tools and equipment to this task
		4.3	Materials relevant to the task
		4.4	Specifications and work instruction to the task
5.	Method of assessment		Competency in this Unit should be assessed through:
		5.1	Direct Observation on actual workplace
		5.2	Questions to underpinning knowledge
		5.3	Demonstration on simulated situation
		5.4	Written/Oral examination
			Evidence provided for competency determination will be Valid, Sufficient & Current
6.	Context for assessment	6.1	Competency may be assessed on the job or simulated environment.
		6.2	The assessment of practical skills should be take place after a period of supervised practice and repetitive experience.
		6.3	Assessment must be undertaken in accordance with Lao PDR CBT assessment guidelines

REPAIR SMALL ENGINE 85

UNIT 19 SERVICE BASIC ELECTRICAL SYSTEM

Unit Code	723.7231.523.005.01
Unit Descriptor	This Unit covers the Skills, Knowledge and Attitudes required to servicing a basic electrical system for motorcycles and/or small agro-machinery's.

UNIT 19 Elements & Performance Criteria

ELEMENTS		PERFORMANCE CRITERIA Italicized terms as elaborated in the Rang of Variables			
1.	Prepare to service a basic electrical system/	1.1	Nature and scope of work requirements are identified, interpreted and confirmed		
	components	1.2	Plan, select and prepare task in accordance with OHS requirements and company/workshop standard operating procedures.		
		1.3	Resources required for servicing are sourced. Work area, hand tools, equipment, service specification data/manual/handbook and spare parts are identified and prepared.		
2.	Service a basic electrical system/ components	2.1	Service basic electrical system/components and test for correct operation in accordance with company/ manufacturer/component supplier specifications		
		2.2	Adjustments made during the service are in accordance with manufacturer/component supplier specifications		
		2.3	Final inspection is made to ensure protective guards, safety features and cowlings are in place.		
3.	Restore work area and complete documentation	3.1 3.2	Restore and clean work area, tools and equipment. Complete and restore Documentation includes job cards, check list, reports and workshop manuals.		

UNIT 19 Range of Variables

	VARIABLES		RANGE
1.	Basic electrical system		Systems include:
		1.1	Charging system
		1.2	Starting system
		1.3	Ignition system
		1.4	Lighting system

2. System components Components may include: 2.1 Wiring, connector, switches, fuse and relays 2.2 Battery 2.3 Charging, lighting and ignition coils 2.4 CDI Unit 2.5 Magneto (CDI and contact based) 2.6 Spark plug 2.7 Front, Rear, Brake and Flasher light assemblies 4. Horn System may be fitted to: 3.1 Vehicles 3.2 Agro-Machinery Faults may include: 4.1 Engine: Poor performance, poor starting 4.2 Short circuit on Electrical System Components 4.3 Inoperative lighting, charging, signal systems 5. Service Methods Service Methods are to include: 5.1 Aural, visual and functional assessments (including damage, corrosion, fluid levels, leaks, wear and safety aspects) 5.2 Adjustment of System components 5.3 Functional Test Manuals and Information may include: 6.1 Verbal or written and graphical instructions, signage, work schedules/plans/specifications 6.2 Safe work procedures related to task 6.3 Regulatory legislative requirements pertaining to the automotive industry including Lao Design Rules 6.4 Company/manufacturer/component supplier service manual/handbook 6.5 Company/manufacturer/component supplier service manual/handbook 6.5 Company/manufacturer/component supplier periodic service maintenance data manual/handbook 7. Tools and Equipment 7. Tools and Equipment may include: 7.1 Hand tools			1.5	Signal system
2.2 Battery 2.3 Charging, lighting and ignition coils 2.4 CDI Unit 2.5 Magneto (CDI and contact based) 2.6 Spark plug 2.7 Front, Rear, Brake and Flasher light assemblies 2.8 Horn 3. Applications System may be fitted to: 3.1 Vehicles 3.2 Agro-Machinery 4. Faults Faults may include: 4.1 Engine: Poor performance, poor starting 4.2 Short circuit on Electrical System Components 4.3 Inoperative lighting, charging, signal systems 5. Service Methods Service Methods are to include: 5.1 Aural, visual and functional assessments (including damage, corrosion, fluid levels, leaks, wear and safety aspects) 5.2 Adjustment of System components 5.3 Functional Test Manuals and Information may include: 6.1 Verbal or written and graphical instructions, signage, work schedules/plans/specifications 6.2 Safe work procedures related to task 6.3 Regulatory legislative requirements pertaining to the automotive industry including Lao Design Rules 6.4 Company/manufacturer/component supplier service manual/handbook 6.5 Company/manufacturer/component supplier service manual/handbook 6.6 Company/manufacturer/component supplier periodic service maintenance data manual/handbook 7. Tools and Equipment Tools and Equipment may include:	2.	System components		Components may include:
2.3 Charging, lighting and ignition coils 2.4 CDI Unit 2.5 Magneto (CDI and contact based) 2.6 Spark plug 2.7 Front, Rear, Brake and Flasher light assemblies 2.8 Horn 3. Applications System may be fitted to: 3.1 Vehicles 3.2 Agro-Machinery 4. Faults Faults Faults may include: 4.1 Engine: Poor performance, poor starting 4.2 Short circuit on Electrical System Components 4.3 Inoperative lighting, charging, signal systems 5. Service Methods Service Methods are to include: 5.1 Aural, visual and functional assessments (including damage, corrosion, fluid levels, leaks, wear and safety aspects) 5.2 Adjustment of System components 5.3 Functional Test Manuals and Information may include: 6.1 Verbal or written and graphical instructions, signage, work schedules/plans/specifications 6.2 Safe work procedures related to task 6.3 Regulatory legislative requirements pertaining to the automotive industry including Lao Design Rules 6.4 Company/manufacturer/component supplier service manual/handbook 6.5 Company/manufacturer/component supplier service manual/handbook 6.6 Company/manufacturer/component supplier periodic service maintenance data manual/handbook 7. Tools and Equipment Tools and Equipment may include:			2.1	Wiring, connector, switches, fuse and relays
2.4 CDI Unit 2.5 Magneto (CDI and contact based) 2.6 Spark plug 2.7 Front, Rear, Brake and Flasher light assemblies 2.8 Horn 3. Applications System may be fitted to: 3.1 Vehicles 3.2 Agro-Machinery 4. Faults Faults may include: 4.1 Engine: Poor performance, poor starting 4.2 Short circuit on Electrical System Components 4.3 Inoperative lighting, charging, signal systems 5. Service Methods Service Methods are to include: 5.1 Aural, visual and functional assessments (including damage, corrosion, fluid levels, leaks, wear and safety aspects) 5.2 Adjustment of System components 5.3 Functional Test 6. Manuals and Information 6.1 Verbal or written and graphical instructions, signage, work schedules/plans/specifications 6.2 Safe work procedures related to task 6.3 Regulatory legislative requirements pertaining to the automotive industry including Lao Design Rules 6.4 Company/manufacturer/component supplier service manual/handbook 6.5 Company/manufacturer/component supplier specification data/manual/handbook 7. Tools and Equipment Tools and Equipment may include:			2.2	Battery
2.5 Magneto (CDI and contact based) 2.6 Spark plug 2.7 Front, Rear, Brake and Flasher light assemblies 2.8 Horn 3. Applications System may be fitted to: 3.1 Vehicles 3.2 Agro-Machinery 4. Faults Faults may include: 4.1 Engine: Poor performance, poor starting 4.2 Short circuit on Electrical System Components 4.3 Inoperative lighting, charging, signal systems 5. Service Methods Service Methods are to include: 5.1 Aural, visual and functional assessments (including damage, corrosion, fluid levels, leaks, wear and safety aspects) 5.2 Adjustment of System components 5.3 Functional Test Manuals and Information may include: 6.1 Verbal or written and graphical instructions, signage, work schedules/plans/specifications 6.2 Safe work procedures related to task 6.3 Regulatory legislative requirements pertaining to the automotive industry including Lao Design Rules 6.4 Company/manufacturer/component supplier specification data/manual/handbook 6.5 Company/manufacturer/component supplier specification data/manual/handbook 7. Tools and Equipment Tools and Equipment may include:			2.3	Charging, lighting and ignition coils
2.6 Spark plug 2.7 Front, Rear, Brake and Flasher light assemblies 2.8 Horn 3. Applications System may be fitted to: 3.1 Vehicles 3.2 Agro-Machinery 4. Faults Faults may include: 4.1 Engine: Poor performance, poor starting 4.2 Short circuit on Electrical System Components 4.3 Inoperative lighting, charging, signal systems 5. Service Methods Service Methods are to include: 5.1 Aural, visual and functional assessments (including damage, corrosion, fluid levels, leaks, wear and safety aspects) 5.2 Adjustment of System components 5.3 Functional Test Manuals and Information may include: 6.1 Verbal or written and graphical instructions, signage, work schedules/plans/specifications 6.2 Safe work procedures related to task 6.3 Regulatory legislative requirements pertaining to the automotive industry including Lao Design Rules 6.4 Company/manufacturer/component supplier specification data/manual/handbook 6.5 Company/manufacturer/component supplier specification data/manual/handbook 6.6 Company/manufacturer/component supplier periodic service maintenance data manual/handbook 7. Tools and Equipment Tools and Equipment may include:			2.4	CDI Unit
2.7 Front, Rear, Brake and Flasher light assemblies 2.8 Horn 3. Applications System may be fitted to: 3.1 Vehicles 3.2 Agro-Machinery Faults may include: 4.1 Engine: Poor performance, poor starting 4.2 Short circuit on Electrical System Components 4.3 Inoperative lighting, charging, signal systems 5. Service Methods Service Methods are to include: 5.1 Aural, visual and functional assessments (including damage, corrosion, fluid levels, leaks, wear and safety aspects) 5.2 Adjustment of System components 5.3 Functional Test Manuals and Information may include: 6.1 Verbal or written and graphical instructions, signage, work schedules/plans/specifications 6.2 Safe work procedures related to task 6.3 Regulatory legislative requirements pertaining to the automotive industry including Lao Design Rules 6.4 Company/manufacturer/component supplier service manual/handbook 6.5 Company/manufacturer/component supplier specification data/manual/handbook 6.6 Company/manufacturer/component supplier periodic service maintenance data manual/handbook 7. Tools and Equipment Tools and Equipment may include:			2.5	Magneto (CDI and contact based)
2.8 Horn 3. Applications System may be fitted to: 3.1 Vehicles 3.2 Agro-Machinery Faults may include: 4.1 Engine: Poor performance, poor starting 4.2 Short circuit on Electrical System Components 4.3 Inoperative lighting, charging, signal systems 5. Service Methods Service Methods are to include: 5.1 Aural, visual and functional assessments (including damage, corrosion, fluid levels, leaks, wear and safety aspects) 5.2 Adjustment of System components 5.3 Functional Test Manuals and Information may include: 6.1 Verbal or written and graphical instructions, signage, work schedules/plans/specifications 6.2 Safe work procedures related to task 6.3 Regulatory legislative requirements pertaining to the automotive industry including Lao Design Rules 6.4 Company/manufacturer/component supplier specification data/manual/handbook 6.5 Company/manufacturer/component supplier specification data/manual/handbook 6.6 Company/manufacturer/component supplier periodic service maintenance data manual/handbook 7. Tools and Equipment Tools and Equipment may include:			2.6	Spark plug
3. Applications System may be fitted to: 3.1 Vehicles 3.2 Agro-Machinery 4. Faults Faults may include: 4.1 Engine: Poor performance, poor starting 4.2 Short circuit on Electrical System Components 4.3 Inoperative lighting, charging, signal systems 5. Service Methods Service Methods are to include: 5.1 Aural, visual and functional assessments (including damage, corrosion, fluid levels, leaks, wear and safety aspects) 5.2 Adjustment of System components 5.3 Functional Test Manuals and Information may include: 6.1 Verbal or written and graphical instructions, signage, work schedules/plans/specifications 6.2 Safe work procedures related to task 6.3 Regulatory legislative requirements pertaining to the automotive industry including Lao Design Rules 6.4 Company/manufacturer/component supplier service manual/handbook 6.5 Company/manufacturer/component supplier specification data/manual/handbook 6.6 Company/manufacturer/component supplier periodic service maintenance data manual/handbook 7. Tools and Equipment Tools and Equipment may include:			2.7	Front, Rear, Brake and Flasher light assemblies
3.1 Vehicles 3.2 Agro-Machinery 4. Faults Faults may include: 4.1 Engine: Poor performance, poor starting 4.2 Short circuit on Electrical System Components 4.3 Inoperative lighting, charging, signal systems 5. Service Methods Service Methods are to include: 5.1 Aural, visual and functional assessments (including damage, corrosion, fluid levels, leaks, wear and safety aspects) 5.2 Adjustment of System components 5.3 Functional Test Manuals and Information may include: 6.1 Verbal or written and graphical instructions, signage, work schedules/plans/specifications 6.2 Safe work procedures related to task 6.3 Regulatory legislative requirements pertaining to the automotive industry including Lao Design Rules 6.4 Company/manufacturer/component supplier service manual/handbook 6.5 Company/manufacturer/component supplier specification data/manual/handbook 6.6 Company/manufacturer/component supplier periodic service maintenance data manual/handbook 7. Tools and Equipment Tools and Equipment may include:			2.8	Horn
4. Faults Faults may include: 4.1 Engine: Poor performance, poor starting 4.2 Short circuit on Electrical System Components 4.3 Inoperative lighting, charging, signal systems 5. Service Methods Service Methods are to include: 5.1 Aural, visual and functional assessments (including damage, corrosion, fluid levels, leaks, wear and safety aspects) 5.2 Adjustment of System components 5.3 Functional Test Manuals and Information may include: 6.1 Verbal or written and graphical instructions, signage, work schedules/plans/specifications 6.2 Safe work procedures related to task 6.3 Regulatory legislative requirements pertaining to the automotive industry including Lao Design Rules 6.4 Company/manufacturer/component supplier service manual/handbook 6.5 Company/manufacturer/component supplier specification data/manual/handbook 6.6 Company/manufacturer/component supplier periodic service maintenance data manual/handbook 7. Tools and Equipment Tools and Equipment may include:	3.	Applications		System may be fitted to:
4. Faults Faults may include: 4.1 Engine: Poor performance, poor starting 4.2 Short circuit on Electrical System Components 4.3 Inoperative lighting, charging, signal systems 5. Service Methods Service Methods are to include: 5.1 Aural, visual and functional assessments (including damage, corrosion, fluid levels, leaks, wear and safety aspects) 5.2 Adjustment of System components 5.3 Functional Test Manuals and Information may include: 6.1 Verbal or written and graphical instructions, signage, work schedules/plans/specifications 6.2 Safe work procedures related to task 6.3 Regulatory legislative requirements pertaining to the automotive industry including Lao Design Rules 6.4 Company/manufacturer/component supplier specification data/manual/handbook 6.5 Company/manufacturer/component supplier specification data/manual/handbook 6.6 Company/manufacturer/component supplier periodic service maintenance data manual/handbook 7. Tools and Equipment Tools and Equipment may include:			3.1	Vehicles
4.1 Engine: Poor performance, poor starting 4.2 Short circuit on Electrical System Components 4.3 Inoperative lighting, charging, signal systems 5. Service Methods Service Methods are to include: 5.1 Aural, visual and functional assessments (including damage, corrosion, fluid levels, leaks, wear and safety aspects) 5.2 Adjustment of System components 5.3 Functional Test Manuals and Information may include: 6.1 Verbal or written and graphical instructions, signage, work schedules/plans/specifications 6.2 Safe work procedures related to task 6.3 Regulatory legislative requirements pertaining to the automotive industry including Lao Design Rules 6.4 Company/manufacturer/component supplier service manual/handbook 6.5 Company/manufacturer/component supplier specification data/manual/handbook 6.6 Company/manufacturer/component supplier periodic service maintenance data manual/handbook 7. Tools and Equipment Tools and Equipment may include:			3.2	Agro-Machinery
4.2 Short circuit on Electrical System Components 4.3 Inoperative lighting, charging, signal systems 5. Service Methods Service Methods are to include: 5.1 Aural, visual and functional assessments (including damage, corrosion, fluid levels, leaks, wear and safety aspects) 5.2 Adjustment of System components 5.3 Functional Test 6. Manuals and Information may include: Information 6.1 Verbal or written and graphical instructions, signage, work schedules/plans/specifications 6.2 Safe work procedures related to task 6.3 Regulatory legislative requirements pertaining to the automotive industry including Lao Design Rules 6.4 Company/manufacturer/component supplier service manual/handbook 6.5 Company/manufacturer/component supplier specification data/manual/handbook 6.6 Company/manufacturer/component supplier periodic service maintenance data manual/handbook 7. Tools and Equipment Tools and Equipment may include:	4.	Faults		Faults may include:
4.3 Inoperative lighting, charging, signal systems 5. Service Methods Service Methods are to include: 5.1 Aural, visual and functional assessments (including damage, corrosion, fluid levels, leaks, wear and safety aspects) 5.2 Adjustment of System components 5.3 Functional Test 6. Manuals and Information may include: 6.1 Verbal or written and graphical instructions, signage, work schedules/plans/specifications 6.2 Safe work procedures related to task 6.3 Regulatory legislative requirements pertaining to the automotive industry including Lao Design Rules 6.4 Company/manufacturer/component supplier service manual/handbook 6.5 Company/manufacturer/component supplier specification data/manual/handbook 6.6 Company/manufacturer/component supplier periodic service maintenance data manual/handbook 7. Tools and Equipment Tools and Equipment may include:			4.1	Engine: Poor performance, poor starting
5. Service Methods Service Methods are to include: 5.1 Aural, visual and functional assessments (including damage, corrosion, fluid levels, leaks, wear and safety aspects) 5.2 Adjustment of System components 5.3 Functional Test Manuals and Information may include: 6.1 Verbal or written and graphical instructions, signage, work schedules/plans/specifications 6.2 Safe work procedures related to task 6.3 Regulatory legislative requirements pertaining to the automotive industry including Lao Design Rules 6.4 Company/manufacturer/component supplier service manual/handbook 6.5 Company/manufacturer/component supplier specification data/manual/handbook 6.6 Company/manufacturer/component supplier periodic service maintenance data manual/handbook 7. Tools and Equipment Tools and Equipment may include:			4.2	Short circuit on Electrical System Components
5.1 Aural, visual and functional assessments (including damage, corrosion, fluid levels, leaks, wear and safety aspects) 5.2 Adjustment of System components 5.3 Functional Test 6. Manuals and Information may include: 6.1 Verbal or written and graphical instructions, signage, work schedules/plans/specifications 6.2 Safe work procedures related to task 6.3 Regulatory legislative requirements pertaining to the automotive industry including Lao Design Rules 6.4 Company/manufacturer/component supplier service manual/handbook 6.5 Company/manufacturer/component supplier specification data/manual/handbook 6.6 Company/manufacturer/component supplier periodic service maintenance data manual/handbook 7. Tools and Equipment Tools and Equipment may include:			4.3	Inoperative lighting, charging, signal systems
damage, corrosion, fluid levels, leaks, wear and safety aspects) 5.2 Adjustment of System components 5.3 Functional Test 6. Manuals and Information may include: 6.1 Verbal or written and graphical instructions, signage, work schedules/plans/specifications 6.2 Safe work procedures related to task 6.3 Regulatory legislative requirements pertaining to the automotive industry including Lao Design Rules 6.4 Company/manufacturer/component supplier service manual/handbook 6.5 Company/manufacturer/component supplier specification data/manual/handbook 6.6 Company/manufacturer/component supplier periodic service maintenance data manual/handbook 7. Tools and Equipment Tools and Equipment may include:	5.	Service Methods		Service Methods are to include:
5.3 Functional Test Manuals and Information may include: 6.1 Verbal or written and graphical instructions, signage, work schedules/plans/specifications 6.2 Safe work procedures related to task 6.3 Regulatory legislative requirements pertaining to the automotive industry including Lao Design Rules 6.4 Company/manufacturer/component supplier service manual/handbook 6.5 Company/manufacturer/component supplier specification data/manual/handbook 6.6 Company/manufacturer/component supplier periodic service maintenance data manual/handbook 7. Tools and Equipment Tools and Equipment may include:			5.1	damage, corrosion, fluid levels, leaks, wear and safety
6. Manuals and Information may include: 6.1 Verbal or written and graphical instructions, signage, work schedules/plans/specifications 6.2 Safe work procedures related to task 6.3 Regulatory legislative requirements pertaining to the automotive industry including Lao Design Rules 6.4 Company/manufacturer/component supplier service manual/handbook 6.5 Company/manufacturer/component supplier specification data/manual/handbook 6.6 Company/manufacturer/component supplier periodic service maintenance data manual/handbook 7. Tools and Equipment Tools and Equipment may include:			5.2	Adjustment of System components
Information 6.1 Verbal or written and graphical instructions, signage, work schedules/plans/specifications 6.2 Safe work procedures related to task 6.3 Regulatory legislative requirements pertaining to the automotive industry including Lao Design Rules 6.4 Company/manufacturer/component supplier service manual/handbook 6.5 Company/manufacturer/component supplier specification data/manual/handbook 6.6 Company/manufacturer/component supplier periodic service maintenance data manual/handbook 7. Tools and Equipment Tools and Equipment may include:			5.3	Functional Test
work schedules/plans/specifications 6.2 Safe work procedures related to task 6.3 Regulatory legislative requirements pertaining to the automotive industry including Lao Design Rules 6.4 Company/manufacturer/component supplier service manual/handbook 6.5 Company/manufacturer/component supplier specification data/manual/handbook 6.6 Company/manufacturer/component supplier periodic service maintenance data manual/handbook 7. Tools and Equipment Tools and Equipment may include:	6.	Manuals and		Manuals and Information may include:

service maintenance data manual/handbook 7. Tools and Equipment Tools and Equipment may include:			6.5	
			6.6	
7.1 Hand tools	7.	Tools and Equipment		Tools and Equipment may include:
			7.1	Hand tools

		7.2	Power tools
		7.3	Multimeter or voltmeter and ohmmeter
		7.4	Battery charger
		7.5	Hydrometer
		7.6	Ammeter
		7.7	Thickness gauge set
		7.8	Engine analyzer
		7.9	Exhaust gas analyzer
8.	8. Company/ workshop standard operating procedures		Company/workshop standard operating procedures include:
		8.1	Verbal or written instructions issued by authorized personal
		8.2	Job order slip
		8.3	Spare parts ordering form
		8.4	Wearing of Personal Protective Equipment
9.	Occupational Health and Safety (OHS) requirements		OHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures, and may include:
		9.1	To conduct of operational risk assessment and treatments associated with Vehicular movements, hazardous substances, Electrical safety manual, lifting and shifting working in proximity to others an site visitors
		9.2	Use of personal protective equipment that include prescribed under legislation regulations codes of practice and workplace policies and practice

UNIT 19 Evidence Guide

Critical aspects of Competency	Assessment requires evidence that the candidate: 1.1 Selecting and used appropriate procedure, manuals, tools and equipment to carry out task
	1.2 Conducting the service of a basic electrical system/ components in accordance with workplace and company/manufacturer/component supplier requirements
	1.3 Performing completed job documentation and work area restore
Underpinning knowledge and	2.1 OHS requirements

	attitudes	2.2	Relevant company/workshop operating procedure
		2.3	Relevant service specification data/manual/handbook
		2.4	Basic electrical system and Components
		2.5	Exhaust gas analyzing
		2.6	Basic electrical system/ components Service procedure
		2.7	Hand/ power tools and workshop Equipment for task
		2.8	Test equipment for task
		2.9	Final inspection procedure
		2.10	Workshop and Equipment maintenance
		2.11	Company/workshop Documentation requirements
3.	Underpinning skills	3.1	Working safely
		3.2	Using Personal Protective Equipment
		3.3	Communication effectively
		3.4	Organizing materials to be used
		3.5	Using and interpreting service specification data/manual/handbook
		3.6	Proper handling and use of tools and equipment
		3.7	Mount and demount System components
		3.8	Using test equipment for task
		3.9	Maintaining orderliness and cleanliness
		3.10	Maintaining customer records
4.	Resource implications		The following resources should be provided:
		4.1	Workplace location or simulated work area
		4.2	Appropriate tools and equipment to this task
		4.3	Materials relevant to the task
		4.4	Specifications and work instruction to the task
5.	Method of assessment		Competency in this Unit should be assessed through:
		5.1	Direct Observation on actual workplace
		5.2	Questions to underpinning knowledge
		5.3	Demonstration on simulated situation
		5.4	Written/Oral examination
			Evidence provided for competency determination will be Valid, Sufficient & Current
6.	Context for assessment	6.1	Competency may be assessed on the job or simulated environment.
		6.2	The assessment of practical skills should be take

Competency Standard: AUTOMOTIVE SERVICE & REPAIR III | Job Title: MOTORBIKE MECHANICS Strengthening Technical and Vocational Education and Training (STVET) Project | ADB Grant 0211-LAO

	place after a period of supervised practice and repetitive experience.
6.3	Assessment must be undertaken in accordance with Lao PDR CBT assessment guidelines

UNIT 20 REPAIR STEERING AND SUSPENSION SYSTEM (MOTORBIKE)

Unit Code	723.7231.433.006.01
Unit Descriptor	This Unit covers the Skills, Knowledge and Attitudes required to repair the steering and suspension system and components for motorbikes.

UNIT 20 Elements & Performance Criteria

ELEMENTS		PERFORMANCE CRITERIA		
		lta	alicized terms as elaborated in the Rang of Variables	
1.	Prepare to repair steering and suspension system/ components	1.1	Nature and scope of work requirements are identified, interpreted and confirmed	
		1.2	Plan, select and prepare tasks in accordance with OHS requirements and company/workshop standard operating procedures	
		1.3	Resources required for repairing are sourced. Work area, hand tools, equipment, repair specification data/manual/handbook and spare parts are identified and prepared	
2.	Diagnose a steering and suspension system	2.1	Steering and suspension system/components are diagnosed in accordance with company/manufacturer/component supplier repair manual requirements	
		2.2	Results are documented and Report is forwarded to persons for action in accordance with workplace procedures	
3.	Repair steering and suspension system/ components	3.1	Repair steering and suspension system/components and test for correct operation in accordance with company/manufacturer/component supplier specifications	
		3.2	Adjustments made during the repair are in accordance with manufacturer/component supplier specifications	
		3.3	Prepare vehicle for test drive, including final inspection to ensure protective guards, safety features and cowlings are in place.	
4.	Restore work area and	4.1	Restore and clean work area, tools and equipment.	
	complete documentation	4.2	Complete and restore Documentation includes job cards, check list, reports and workshop manuals.	

UNIT 20 Range of Variables

	VARIABLES		RANGE
1.	Suspension System		Front and rear suspension systems include:
		1.1	Telescopic fork front suspension system
		1.2	Twin-shock, regular swingarm
		1.3	Monoshock, regular swingarm
		1.4	Monoshock, single-sided swingarm
2.	Steering and		Components may include:
	suspension	2.1	Steering head assembly
	components	2.2	Front fork assembly
		2.3	Rear shock absorber
		2.4	Swing arm assembly
		2.5	Suspension
		2.6	Bush (swing arm and rear shock absorber)
		2.7	Dust seal
		2.8	Oil seal, O-ring
		2.9	Front fork oil/lubrication to manufacture specification
		2.10	Bearing grease to manufacture specification
3.	Applications		System may be fitted to:
		3.1	Motorbike
		3.2	Sidecar
4.	Faults		Faults may include:
		4.1	Front-end chatter
		4.2	Stiff steering
		4.3	Lack of rebound
		4.4	Shock lack of compression
		4.5	Oil leaks
		4.6	Scratches
		4.7	Rust
		4.8	Dent
5.	Repair Methods		Repair methods are to include:
		5.1	Aural, visual and functional assessments (including damage, corrosion, fluid levels, leaks, wear and safety aspects)
		5.2	Diagnosis of steering and suspension system/components

		5.3	Adjustment of steering and system components
		5.4	Static and dynamic functional steering and suspension Test
		5.5	Road test drive
		5.5	
6.	Manuals and Information		Manuals and Information may include:
	IIIOIIIIatioii	6.1	Verbal or written and graphical instructions, signage, work schedules/plans/specifications
		6.2	Safe work procedures related to task
		6.3	Regulatory legislative requirements pertaining to the automotive industry including Lao Design Rules
		6.4	Company/manufacturer/component supplier repair manual/handbook
		6.5	Company/manufacturer/component supplier specification data/manual/handbook
		6.6	Company/manufacturer/component supplier Periodic Service Maintenance Data manual/handbook
7.	Tools and Equipment		Tools and Equipment may include:
		7.1	Hand tools
		7.2	Power tools
		7.3	Torque wrench
		7.4	Oiler
		7.5	Oil changer/ tank
		7.6	Motorbike support stand set
8.	Company/ workshop standard operating		Company/workshop standard operating procedures include:
	procedures	8.1	Verbal or written instructions issued by authorized personal
		8.2	Job order slip
		8.3	Spare parts ordering form
		8.4	Wearing of Personal Protective Equipment
9.	Occupational Health and Safety (OHS) requirements	9.1	OHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures, and may include: To conduct of operational risk assessment and treatments associated with Vehicular movements, hazardous substances, Electrical safety manual, lifting and shifting working in proximity to others a site

9.2	Use of personal protective equipment that include
	prescribed under legislation regulations codes of
	practice and workplace policies and practice

UNIT 20 Evidence Guide

	I aspects of		Assessment requires evidence that the candidate:
Comp	Competency	1.1	Selecting and used appropriate procedure, manuals, tools and equipment to carry out task
		1.2	Diagnosing and used method for steering and suspension system test in reference to company/manufacturer/component supplier repair requirements
		1.3	Conducting the repair of a steering and suspension system/ components in accordance with workplace and company/manufacturer/component supplier requirements
		1.4	Performing completed job documentation and work area restore
2. Under	pinning	2.1	OHS requirements
	knowledge and attitudes	2.2	Relevant company/workshop operating procedure
attitud		2.3	Relevant repair specification data/manual/handbook
		2.4	Principle operation of hydraulic and gas type suspension system and components
		2.5	Classification of bearing grease and hydraulic lubricants for steering and suspension systems
		2.6	Steering and suspension system/ components diagnosis procedure
		2.7	Steering and suspension system/ components repair procedure
		2.8	Hand/ power tools and workshop equipment for task
		2.9	Relevant test equipment for task
		2.10	Dangers of working on steering and suspension system/components
		2.11	Vehicle moving, positioning and lifting for task
		2.12	Final inspection procedure
		2.13	Workshop and Equipment maintenance
		2.14	Company/workshop Documentation requirements
3. Under	pinning skills	3.1	Working safely
		3.2	Using Personal Protective Equipment

		3.3	Communication effectively
		3.4	Organizing materials to be used
		3.5	Using and interpreting repair specification data/manual/handbook
		3.6	Proper handling and use of tools and equipment
		3.7	Mounting and demount System components
		3.8	Using test equipment for task
		3.9	Maintaining orderliness and cleanliness
		3.10	Maintaining customer records
4.	Resource implications		The following resources should be provided:
		4.1	Workplace location or simulated work area
		4.2	Appropriate tools and equipment to this task
		4.3	Materials relevant to the task
		4.4	Specifications and work instruction to the task
5.	Method of assessment		Competency in this Unit should be assessed through:
		5.1	Direct Observation on actual workplace
		5.2	Questions to underpinning knowledge
		5.3	Demonstration on simulated situation
		5.4	Written/Oral examination
			Evidence provided for competency determination will be Valid, Sufficient & Current
6.	Context for assessment	6.1	Competency should be assessed on the job or simulated environment.
		6.2	The assessment of practical skills should be take place after a period of supervised practice and repetitive experience.
		6.3	Assessment must be undertaken in accordance with Lao PDR CBT assessment guidelines

UNIT 21 SERVICE PETROL FUEL SYSTEM

Unit Code	723.7231.223.007.01
Unit Descriptor	This Unit covers the Skills, Knowledge and Attitudes required to servicing on mechanical and/or basic electric/electronic fuel system / components.

UNIT 21 Elements & Performance Criteria

	ELEMENTS		PERFORMANCE CRITERIA
		lta	alicized terms as elaborated in the Rang of Variables
	repare to service etrol fuel system/	1.1	Nature and scope of work requirements are identified, interpreted and confirmed
СО	components	1.2	Plan, select and prepare task in accordance with OHS requirements and company/workshop standard operating procedures
		1.3	Resources required for servicing are sourced. Work area, hand tools, equipment, service specification data/manual/handbook and spare parts are identified and prepared
	ervice a petrol fuel ystem/ components	2.1	Service petrol fuel system/components and test for correct operation in accordance with company/ manufacturer/component supplier specifications
		2.2	Adjustments made during the service are in accordance with manufacturer/component supplier specifications
		2.3	Prepare vehicle for test drive, including final inspection to ensure protective guards, safety features and cowlings are in place
co	estore work area and omplete ocumentation	3.1 3.2	Restore and clean work area, tools and equipment. Complete and restore Documentation includes job cards, check list, reports and workshop manuals.

UNIT 21 Range of Variables

VARIABLES			RANGE
1.	Petrol fuel system		Systems include:
		1.1	Mechanical petrol fuel systems
2.	System components		Components may include:
		2.1	Fuel Tank

		2.0	Fuel Filter
		2.2	Fuel Filter
		2.3	Fuel Lines
		2.4	Fuel Lines Carburator
		2.5	Carburetor Machanical cable (Threttle, Chake)
		2.6	Mechanical cable (Throttle, Choke)
		2.7	Air cleaner assembly
3.	Applications		System may be fitted to:
		3.1	Vehicles
		3.2	Agro-Machinery
		3.3	Outdoor power equipment
		3.4	Marine craft
		3.5	Plant
4.	Faults		Faults may include:
		4.1	Engine: Poor performance, poor starting
		4.2	Blocked Filter
		4.3	Leaks
5.	Service Methods		Service Methods are to include:
		5.1	Aural, visual and functional assessments (including damage, corrosion, fluid levels, leaks, wear and safety aspects)
		5.2	Adjustment of System components
		5.3	Functional Test
6.	Manuals and		Manuals and Information may include:
	Information	6.1	Verbal or written and graphical instructions, signage, work schedules/plans/specifications
		6.2	Safe work procedures related to task
		6.3	Regulatory legislative requirements pertaining to the automotive industry including Lao Design Rules
		6.4	Company/manufacturer/component supplier service manual/handbook
		6.5	Company/manufacturer/component supplier specification data/manual/handbook
		6.6	Company/manufacturer/component supplier periodic service maintenance data manual/handbook
7.	Tools and Equipment		Tools and Equipment may include:
		7.1	Hand tools
		7.2	Power tools

		7.3	Vacuum gauge
		7.4	Pressure gauge
		7.5	Calibration tools
		7.6	Multimeter
		7.7	Engine analyzer
		7.8	Exhaust gas analyzer
8.	Company/ workshop standard operating		Company/workshop standard operating procedures include:
	procedures	8.1	Verbal or written instructions issued by authorized personal
		8.2	Job order slip
		8.3	Spare parts ordering form
		8.4	Wearing of Personal Protective Equipment
9.	Occupational Health and Safety (OHS) requirements		OHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures, and may include:
	9.1	9.1	To conduct of operational risk assessment and treatments associated with Vehicular movements, hazardous substances, Electrical safety manual, lifting and shifting working in proximity to others a site visitors
		9.2	Use of personal protective equipment that include prescribed under legislation regulations codes of practice and workplace policies and practice

UNIT 21 Evidence Guide

1. Critical a	•		Assessment requires evidence that the candidate:
Compet	ency	1.1	Selecting and used appropriate procedure, manuals, tools and equipment to carry out task
		1.2	Conducting the service of a petrol fuel systems in accordance with workplace and company/manufacturer/component supplier requirements
		1.3	Performing completed job documentation and work area restore
2. Underpi	0	2.1	OHS requirements
	attitudes	2.2	Relevant company/workshop operating procedure
allitudes		2.3	Relevant service specification data/manual/handbook
		2.4	Petrol fuel system and components

		2.5	Exhaust gas analyzing
		2.6	Petrol Fuel System/Components Service procedure
		2.7	Hand/ power tools and workshop Equipment for task
		2.8	Test equipment for task
		2.9	Final inspection procedure
		2.10	Workshop and Equipment maintenance
		2.11	Company/workshop Documentation requirements
3.	Underpinning skills	3.1	Working safely
		3.2	Using Personal Protective Equipment
		3.3	Communication effectively
		3.4	Organizing materials to be used
		3.5	Using and interpreting service specification data/manual/handbook
		3.6	Proper handling and use of tools and equipment
		3.7	Mount and demount System components
		3.8	Using test equipment for task
		3.9	Maintaining orderliness and cleanliness
		3.10	Maintaining customer records
4.	Resource implications		The following resources should be provided:
		4.1	Workplace location or simulated work area
		4.2	Appropriate tools and equipment to this task
		4.3	Materials relevant to the task
		4.4	Specifications and work instruction to the task
5.	Method of assessment		Competency in this Unit should be assessed through:
		5.1	Direct Observation on actual workplace
		5.2	Questions to underpinning knowledge
		5.3	Demonstration on simulated situation
		5.4	Written/Oral examination
			Evidence provided for competency determination will be Valid, Sufficient & Current
6.	Context for assessment	6.1	Competency may be assessed on the job or simulated environment.
		6.2	The assessment of practical skills should be take place after a period of supervised practice and repetitive experience.
		6.3	Assessment must be undertaken in accordance with Lao PDR CBT assessment guidelines

UNIT 22 REPAIR COOLING SYSTEM

Unit Code	723.7231.223.008.01
Unit Descriptor	This Unit covers the Skills, Knowledge and Attitudes required repairing an engine cooling system.

UNIT 22 Elements & Performance Criteria

ELEMENTS		PERFORMANCE CRITERIA		
		Italicized terms as elaborated in the Rang of Variables		
1.	Prepare to repair cooling system/	1.1 Nature and scope of work requirements are identified, interpreted and confirmed		
	components	1.2 Plan, select and prepare tasks in accordance with OHS requirements and company/workshop standard operating procedures		
		1.3 Resources required for repairing are sourced. Work area, hand tools, equipment, repair specification data/manual/handbook and spare parts are identified and prepared		
2.	Diagnose a cooling system	2.1 Cooling system/components are diagnosed in accordance with company/manufacturer/component supplier repair manual requirements		
		2.2 Results are documented and Report is forwarded to persons for action in accordance with workplace procedures		
3.	Repair cooling system/ components	3.1 Repair cooling system/components and test for correct operation in accordance with company/manufacturer/component supplier specifications		
		3.2 Adjustments made during the repair are in accordance with manufacturer/component supplier specifications		
		3.3 Prepare vehicle for test drive, including final inspection to ensure protective guards, safety features and cowlings are in place.		
4.	Restore work area and	4.1 Restore and clean work area, tools and equipment.		
	complete documentation	4.2 Complete and restore Documentation includes job cards, check list, reports and workshop manuals.		

100

UNIT 22 Range of Variables

	VARIABLES		RANGE
1.	Cooling System		Systems include:
		1.1	Water/liquid cooled engine
		1.2	Air cooled engine
		1.3	Oil cooled engine
2.	System components		Components may include:
		2.1	Radiator
		2.2	Radiator pressure cap
		2.3	Cooling fan
		2.4	Water/liquate pump
		2.5	Thermostat
		2.6	Reservoir tank
		2.7	Hose
		2.8	Clamp
		2.9	Heater core
		2.10	Temperature gauge
		2.11	Coolant concentration
3.	Applications		System may be fitted to:
		3.1	Light vehicles including Motorbikes
		3.2	Agro-Machinery
		3.3	Outdoor power equipment
		3.4	Marine craft
		3.5	Plant
4.	Faults		Faults may include:
		4.1	Engine overheating
		4.2	Poor passenger room heating
		4.3	Leaks
		4.4	Corrosion
		4.5	Cracks
5.	Repair Methods		Repair methods are to include:
		5.1	Aural, visual and functional assessments (including damage, corrosion, fluid levels, leaks, wear and safety aspects)
		5.2	Diagnosis of cooling system/components
		5.3	Adjustment of System components

REPAIR COOLING SYSTEM 101

		5.4	Static and dynamic functional Cooling System Test
6.	Manuals and		Manuals and Information may include:
	Information	6.1	Verbal or written and graphical instructions, signage, work schedules/plans/specifications
		6.2	Safe work procedures related to task
		6.3	Regulatory legislative requirements pertaining to the automotive industry including Lao Design Rules
		6.4	Company/manufacturer/component supplier repair manual/handbook
		6.5	Company/manufacturer/component supplier specification data/manual/handbook
		6.6	Company/manufacturer/component supplier Periodic Service Maintenance Data manual/handbook
7.	Tools and Equipment		Tools and Equipment may include:
		7.1	Hand tools
		7.2	Power tools
		7.3	Cooling system pressure gauge test set
		7.4	Two post vehicle lift or long floor jack and support stand set
8.	Company/ workshop standard operating		Company/workshop standard operating procedures include:
	procedures	8.1	Verbal or written instructions issued by authorized personal
		8.2	Job order slip
		8.3	Spare parts ordering form
		8.4	Wearing of Personal Protective Equipment
9.	Occupational Health and Safety (OHS) requirements		OHS requirements are to be in accordance with legislation/regulations/codes of practice and enterprise safety policies and procedures, and may include:
	9.1	9.1	To conduct of operational risk assessment and treatments associated with Vehicular movements, hazardous substances, Electrical safety manual, lifting and shifting working in proximity to others a site visitors
		9.2	Use of personal protective equipment that include prescribed under legislation regulations codes of practice and workplace policies and practice

UNIT 22 Evidence Guide

1.	Critical aspects of		Assessment requires evidence that the candidate:
	Competency	1.1	Selecting and used appropriate procedure, manuals, tools and equipment to carry out task
		1.2	Diagnosing and used method for cooling system test in reference to company/manufacturer/component supplier repair requirements
		1.3	Conducting the repair of a cooling system/ components in accordance with workplace and company/manufacturer/component supplier requirements
		1.4	Performing completed job documentation and work area restore
2.	Underpinning	2.1	OHS requirements
	knowledge and attitudes	2.2	Relevant company/workshop operating procedure
	attitudes	2.3	Relevant repair specification data/manual/handbook
		2.4	Operation and function of cooling system/ components including Types of coolant additive
		2.5	Cooling system/ components diagnosis procedure
		2.6	Cooling system/ components repair procedure
		2.7	Hand/ power tools and workshop equipment for task
		2.8	Relevant test equipment for task
		2.9	Dangers of working on cooling systems
		2.10	Vehicle moving, positioning and lifting for task
		2.11	Final inspection procedure
		2.12	Workshop and Equipment maintenance
		2.13	Company/workshop Documentation requirements
3.	Underpinning skills	3.1	Working safely
		3.2	Using Personal Protective Equipment
		3.3	Communication effectively
	3	3.4	Organizing materials to be used
		3.5	Using and interpreting repair specification data/manual/handbook
		3.6	Proper handling and use of tools and equipment
		3.7	Mounting and demount System components
		3.8	Using test equipment for task
		3.9	Maintaining orderliness and cleanliness
		3.10	Maintaining customer records

REPAIR COOLING SYSTEM 103

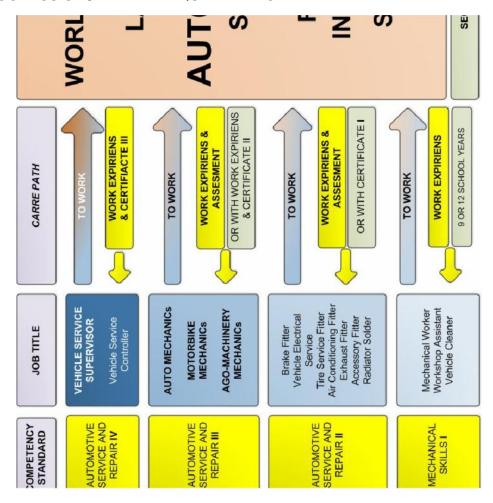

4.	Resource implications	4.1 4.2 4.3 4.4	The following resources should be provided: Workplace location or simulated work area Appropriate tools and equipment to this task Materials relevant to the task Specifications and work instruction to the task
5.	Method of assessment	5.1 5.2 5.3 5.4	Competency in this Unit should be assessed through: Direct Observation on actual workplace Questions to underpinning knowledge Demonstration on simulated situation Written/Oral examination Evidence provided for competency determination will be Valid, Sufficient & Current
6.	Context for assessment	6.1 6.2 6.3	Competency may be assessed on the job or simulated environment. The assessment of practical skills should be take place after a period of supervised practice and repetitive experience. Assessment must be undertaken in accordance with Lao PDR CBT assessment guidelines
